

FERTILE | GENTLE | GROWTHY | ADAPTED | **BRAHMANS**

BULL SALE

20 July 2024

HELMSMAN ADAPTED SYSTEM

Original Helmsman Bid System created by Bruce Milne.

Buying commercial herd bulls this way combines useful features from auction and private treaty systems. You have the opportunity to bid on, and buy any bull in the catalogue at a competitive market value without pressure.

1. On arrival, intending purchasers register at the bid table and receive a Bid Number.
2. All bulls are penned for inspection, by category, as per the catalogue.
3. Opportunities abound. At 9am, all bulls are on the market simultaneously. You bid on any lot, regardless of catalogue sequence, by lodging a bid slip with a "runner". Having reached your price limit on a bull, you simply move onto your next selection of bulls anywhere in the catalogue.
4. From 9am buyers' opening bids will commence, starting at the base price written on the bidding boards. Further advances at a minimum bid value (as per the coloured schedule at right). There is no upper limit on the bids.
5. Bids are recorded on every bull, showing 'buyer number' and \$ value, on large boards, by category, in the central hub of the bull yards.
6. A bid, once submitted and recorded, is the responsibility of that bidder.
7. Coloured Timetable (see right).
At set times during the day, bulls with no new bids for a set period, will be deemed sold, as per ink colour. This helps multiple buyers, by designated times, to know they have secured their tally. It also enables some clients to exit the sale by 2.30pm, confident that their purchases are secure.

THE BENEFITS

NO SPLIT-SECOND DECISIONS. You have time to consider, to select and place deliberated bids on the entire catalogue.

By 1pm, buyers will know their core tallies with ample time to re-select other bulls, or advance bidding without auction pressure of instant decisions.

Re-selection is easy, as the yards are full of very similar genetics.

Buyers of groups of bulls with Helmsman gives broad choices, flexibility and time to average your budget.

9am to 12 noon

Bids of **\$200** or higher.
All bids will be recorded in **BLUE** pen

12 noon to 1.00pm

Bids of **\$300** or higher.
All bids will be recorded in **RED** pen

At 1pm

Any bull price remaining in the original pen colour of **BLUE**, will be **deemed officially sold** for the amount listed to the buyer listed.

Lunch 1.00pm to 1.30pm

All bidding will be suspended while we enjoy some lunch.

1.30pm to 2.00pm

Bids of **\$400** or higher.
All bids will be recorded in **GREEN** pen

At 2.00pm

Any bull price remaining in the original pen colour of **RED**, will be **deemed officially sold** for the amount listed to the buyer listed.

2.00pm to 2.30pm

Bids of **\$500** or higher.
All bids will be recorded in **PURPLE** pen

At 2.30pm

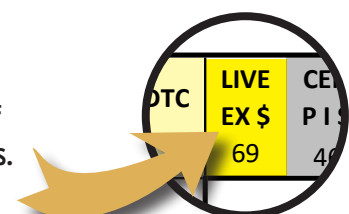

Any bull price remaining in the original pen colour of **GREEN**, will be **deemed officially sold** for the amount listed to the buyer listed.

At 2.30pm

Any bulls in **PURPLE** pen will be individually, verbally listed and further bids will be taken at this time in an open auction (to enable sale closure in reasonable time).

GO FOR GOLD!

CBV Terms and Conditions of Entry and Sale | 19-20 July, 2024.

CBV will invoice after the sale, with payment due up to 30 days from invoice date.

All bulls are sold as herd bulls for commercial use only, and not seed stock use.

All semen rights remain solely with the vendors.

Freight cost, insurance and NLIS transfers are the responsibility of purchasers.

Sale format: Helmsman bid system.

Delivery: CBV will help coordinate delivery of joint loads where possible.
CBV takes no responsibility for bulls in transit.

Injury to persons or property: All persons attending the sale do so at their own risk, and the sale principals assume no liability or responsibility, legal or otherwise, for any accident or injury that may occur.

Thank you for blessing us with your presence and participation at CBV.

Airstrip: 22° 40' 34.27" SOUTH | 149° 53' 51.72" EAST

A large herd of brown and white cows is shown in a field, with some cows in the foreground looking towards the camera. The background is slightly blurred, showing more cows and a fence line.

Welcome again

Look deeply into Nature,
then you will understand
everything better. (Albert Einstein)

Simple abundance, fuelled by honest cows and over 200 elite sires.

Broad collaboration and development of
co-operator associate herds.

Adapted cattle are by far the best return on
capital.

Based on grass, land, and time.

Managing well into the future is dependent on
our **willingness to accept** our ability to adapt.

Land is simply very expensive, per animal unit, or
per hectare. We have heard this mantra so many
times, yet there's no doubt that it is possible and
practical to grow a cattle business, amongst all
challenges.

CBV hunts genetically for the factors that make a
difference to growing these businesses.

If it's always profitable, it can simply be fun.

Developing truly proven and adapted cattle for
the difficult jobs ahead is a noble task; finding
economic marathon runners in a very real sense.

to

2024

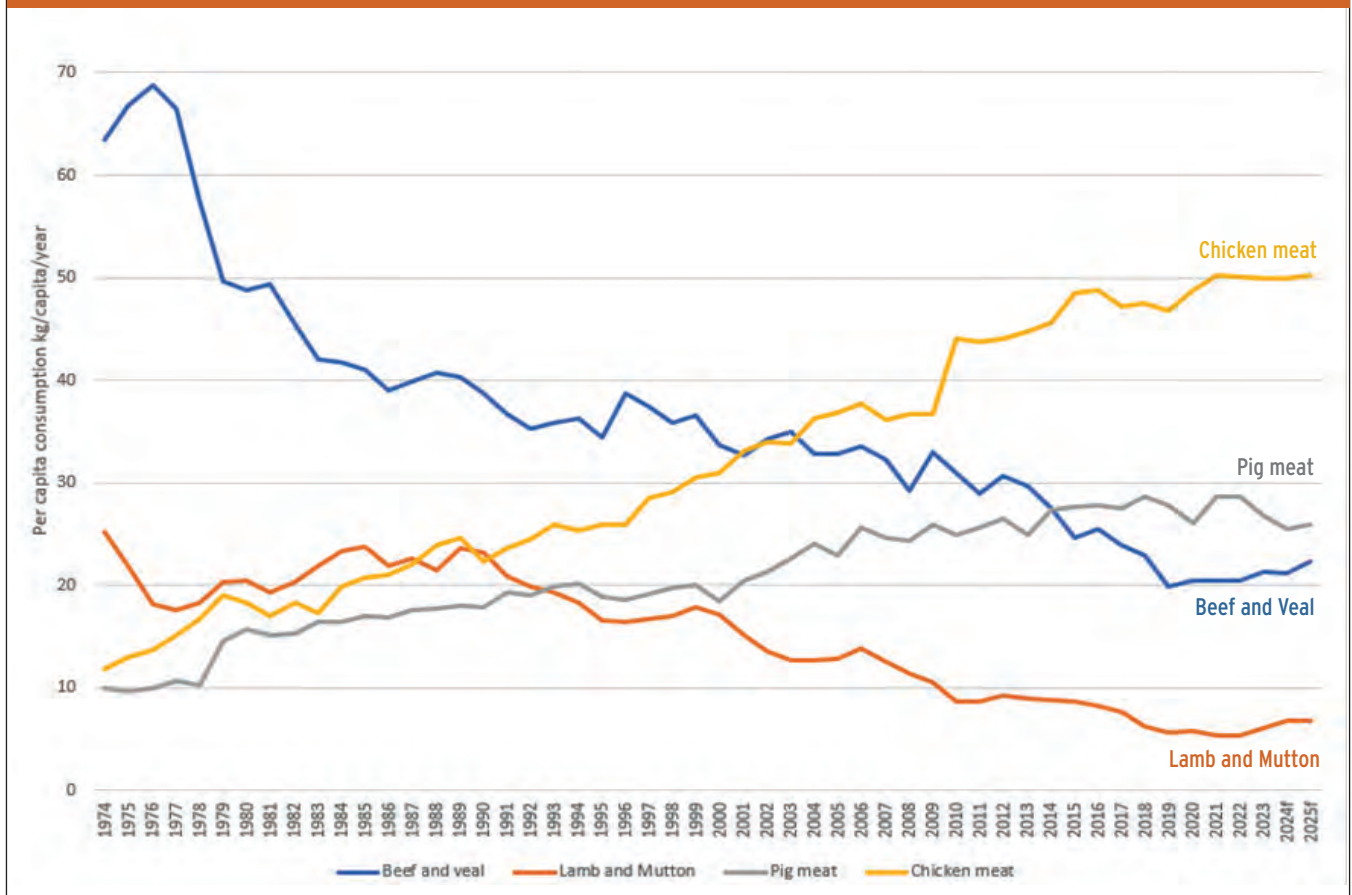

CBV | THE Breed within a breed

- No doubt,
- proven beyond all reasonable doubt,
- by production and practical management,
- low operational costs, mostly land cost, per animal unit,
- high speed growth,
- rapid recovery from tough seasons,
- simple really, solutions to a complex of biology, endocrinology, and production,
- 45th year of focusing only on genetic progress,
- always at low cost....always!

**Become familiar
with what makes
the difference. CBV!**

**Reproduction.
On time. Every time.
Never forget...
At low cost...**

Per capita consumption

Keep lifting the cost of production at your peril!

The study of per capita protein consumption is a classic example of where CBV focused management has hit the target with low cost operation, in relevant genetic terms.

Poultry is constantly winning consumer preference, followed by pork, with beef and lamb in constant decline.... Mostly this is driven by retail cost, underlain by cost of production.

The same patterns are obvious in all continents.

The revelation of epigenetics,

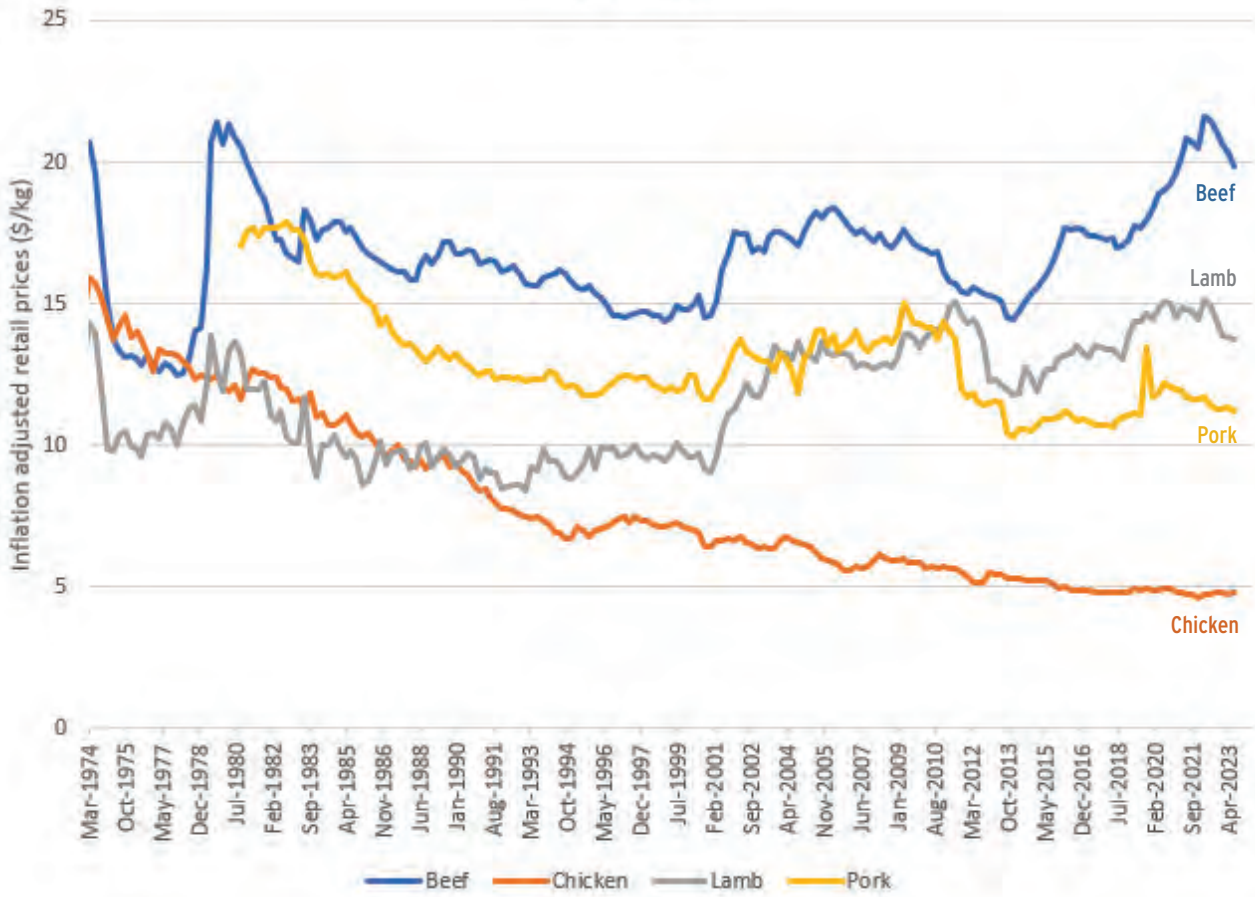

- Expression of successful genes, triggered by selection under duress.
- this progressive thinking has been central to CBV continuous development,
- full of meaning and purpose,
- this progress is worth understanding,
- CBV has the most focused genetic program in the Brahman world for profit and competence.

The CBV program is deeply rooted in the values of adaptation, reproduction, and epigenetics.

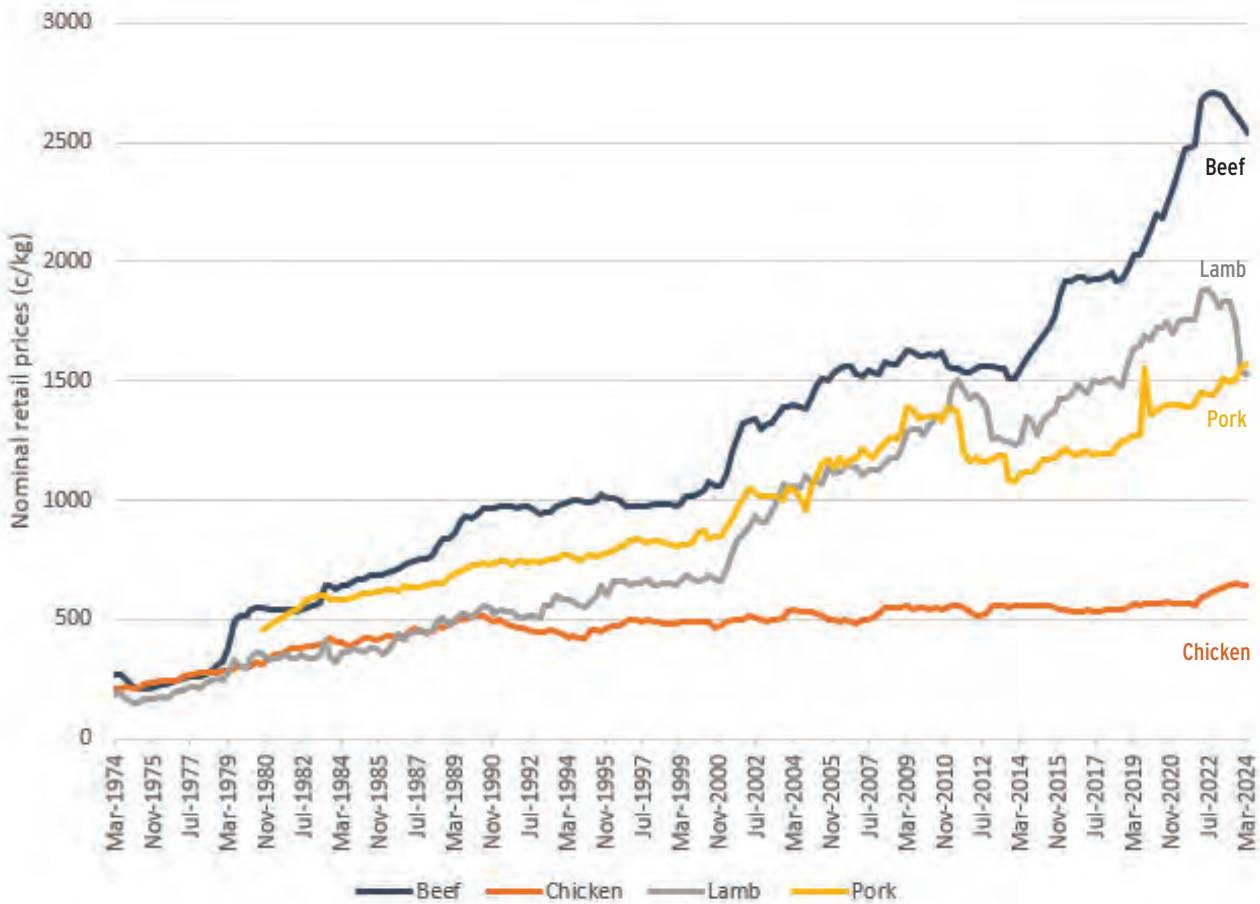

- focused for a lifetime, it seems.
- unshaken faith in the role of 'Brahmans by analysis',
- fuelled by a broad ranging experimental perspective,
- aided by collaboration with science, experimentation, co-operation,
- challenged by adversity, of economic, biologic, geographic, and bureaucratic impacts,
- still unshaken, the '**CBV Brahman breed**' is pure substance,
- no shadows, simply economic, practical, purpose driven,
- There is no limit to genetic progress based on low cost management.

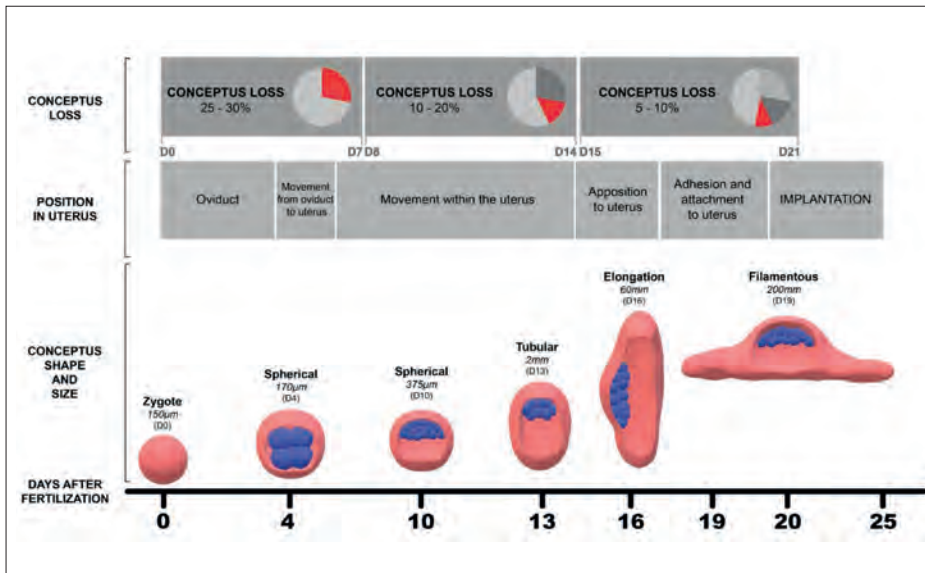

Stand for something good. (Drew Pavlou. UQ.)

Nominal Prices

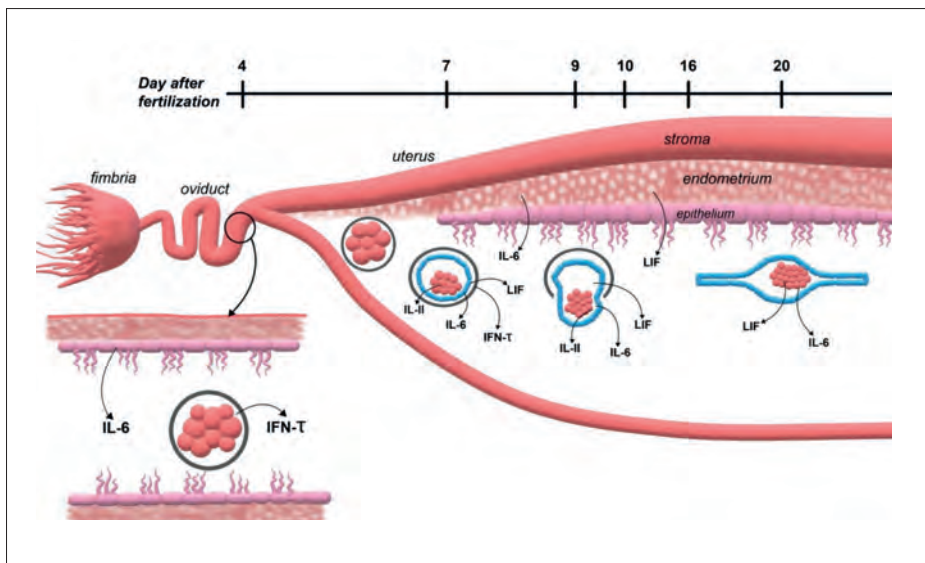

TOP LEFT:

Fertilisation rates in cattle are in the order of 85-95%. However, 40-60% of embryos do not survive to day 21 when attachment of the embryo to the uterus has commenced. This represents a huge reproductive loss that often is not recognised. A deeper understanding of why so many embryos fail to establish a pregnancy, and the identification and selection of females with high embryo survival, would be a major improvement in reproductive efficiency.

Authors: Prof Giuseppe Campanile, Dr Antonio Limone, Prof Pietro Baruselli, Prof Emer Michael D'Occhio
Graphic: Dr Fabio de Moraes Francisco
Theriogenology vol 167, p 1-12, 2021

BOTTOM LEFT:

In cattle, the embryo enters the uterus at around day 5 after fertilisation. There is a lot of communication between the embryo and uterus and some of this crosstalk involves immunological factors such as interleukin-6 (IL-6) and interferon tau (IFN-τ). The communication is important so that the uterus does not reject the embryo, and maternal recognition of pregnancy is achieved. A deeper understanding of this communication would lead to the identification and selection of females that have a uterine environment that supports the developing embryo.

Authors: Prof Giuseppe Campanile, Dr Antonio Limone, Prof Pietro Baruselli, Prof Emer Michael D'Occhio
Graphic: Dr Fabio de Moraes Francisco
Theriogenology vol 167, p 1-12, 2021

CBV focused on uterine survival and rapid re-breeding regardless of environment.

Scientists agree that globally, 45% to 60% of conceptions are lost in utero during the first 21 days. Since 1991, CBV has worked on this genetically, to multiply the fastest rebreeding rates on limited grazing space (low cost) with amazing 'in-field' results. In 1991, I asked Professor Jim Kinder (with whom we were collaborating at CBV) and Professor Michael D'Occhio (at CSIRO on another reproduction project) a question.

Q: We are favouring the sons of cows with superfast rebreeding rates. Are we wasting our time - or is this a legitimate goal?

A: Kinder and D'Occhio got involved in intense scientific conversation. Kinder: **"Well, no one looks at bovines this way Alf, but it's highly heritable in hogs - Go for it !!"**

The rest is history. The highest rated proven Brahman Sire that we know of in our world, is -49.3 'Days to Calving' (DTC EBV - Breed Average of +0.2) and a LiveEx \$ Index of \$177 (Breed Average of \$22) [ABBA 2022 born calves]

That bull is just one of over 200 current CBV sires reflecting **25 years FOCUSED ON ECONOMIC and GENETIC REALITY.**

Certainly this is no flash-in-the-pan 'KNEE-JERK', **THIS IS APPLIED SCIENCE.**

Many generations breeding and measuring in adversity strengthens these ideals in a practical sense.

THIS HAS EVERY CHANCE OF INFLUENCING PROFIT IN ANYONE'S HERD.

The hunt for truly meaningful economic results has long been the study of Emeritus Professor Michael D'Occhio, inspired by his understanding of endocrinology and reproduction physiology and its immutable linkage to profit. We have been blessed with forty years of his brilliance, integrity, and encouragement.

We give great tribute to Michael, along with Professors Jim Kinder, Pietro Baruselli, Guiseppe Campanile, and Antonio Limone; all collaborators and mentors across four continents.

These highly qualified thinkers and researchers understand the hunt for fertility driven profits, underpinned by their realm of science. They continue to collaborate and seek new and innovative pathways for the betterment of livestock production.

One of our wonderful collaborators in genomics, Prof Ben Hayes, in conversation recently said that he "would adopt our CBV mantra of 'a calf on time, every time, at low cost'", to encapsulate all the variable debates about the definition of Adaptation.

Prof Ben Hayes, and Prof Mike Goddard made great progress in dairy cattle genomics, in a global sense, and latterly in collaborative research with CBV fertility research.

"What is truly adapted?"... It is all about seeking profit in the grazing business.

The Eureka Moment is always based on adaptation and reproduction competence, at low cost.

As humans, we interpret from what we know, **not** from what we **need** to know. That may be comforting in the short-term, but in the long game of progress, bound to be disappointing.

Specifically at CBV and associate herds, **the results of that focus have surprised us**, and astounded stud pedigree breeders, their Breed Societies and extensionists who stated there was no role for reproduction in genetic progress in adapted cattle and food production.

Adapted cattle are certainly our answer in our hunt for higher production and lower costs. That is, kg per hectare per 100mm of rain, and pregnant on time, every time. Trash the rest.

HOME TRUTHS...

For CBV S24 Mated Sires

- 37 in the Top 1% for DTC (av. -28);
43 in the Top 1% for Live Ex Index (av. \$115)
- All 129 Sires av. -22 DTC (Top 2%);
Live Ex Index av. \$94 (Top 3%)

In my own case, I know how much I have benefited from gentle but persuasive encouragement to the next level of thinking, by respectful friends and mentors.

Practical men and women, and brilliant scientists in many countries, have gone out of their way to stimulate our enquiring minds; sharing their lifelong experiences.

As in every story of progress, in science or commerce, we owe a huge gratitude to those who strode fearlessly before and during my time in cattle. No one person can claim universal or exclusive ascendancy; daily I thank God for His creations and the wonderful cattle and people He has put in our path.

The strength, courage, kindness, faith and example set by my wonderful parents in retrospect, still grows. Blessings abound in this simple abundance.

Sincerely,

Alf Collins CBV

CBV Genetics Group

CBV Associate Herds are a strong element in our pure depth of data and global analysis. We share sires, collaborate on breeding strategies, jointly market and have fun. Well over 200 sires, of high accuracy are utilised. Roughly 12,000 head of brahmans, all managed on strict schedules, with roughly 40 years of background data in each herd - a cumulative data base, bigger and stronger than many breeds in Australia, all adds up to a formidable genetic powerhouse. These families have undertaken the CBV management template and goals for 9 to 13 years each, with spectacular success. They access all of their sires lines from CBV.

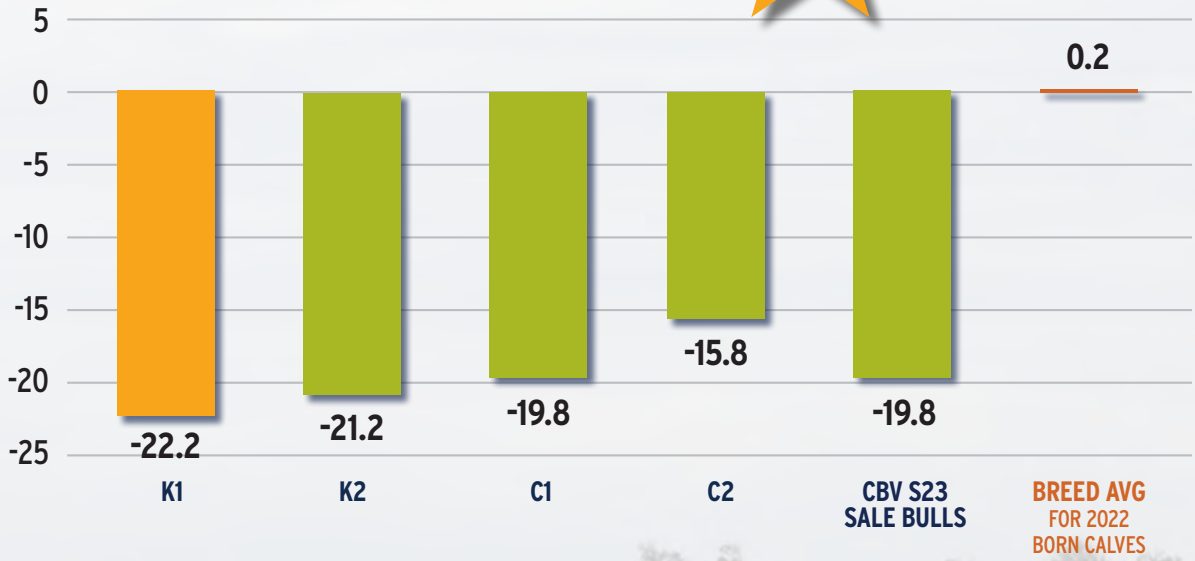

Their success gives us a very broad data-set, across different regions. That all helps to strengthen our analysis.

CBV IS NOT A MODEL - it is real, Proven, Growing and Dynamic CO-OPERATION.

DISCOVERY...

CBV THE BREED WITHIN A BREED

High efficiency Brahmans. Adapted beef cattle. No doubt about it.

CBV has **never** tried to prop up our search for meaningful genetics by light stocking rates, rich diets, or extraordinary country.

We do find true marathon runners in genetic terms.

All other vendor's cattle including Heifers on coastal country this year.

CBV stock-days per hectare per 100 mm are quite extreme.

CBV 'speed bands' for mating are illustrative and transparent. (C1 to C5 digitally)
Speed Bands are; Alpha, Bravo, Charlie, Delta, and Echo, in phonetics - the ABC of genetics at work on grass.

Learn more about these ABC structures by calling CBV.

There are no shortcuts, no quick fixes - more a matter of doing lots of small things well... Relentlessly!

So... CBV focuses on

- what we can influence,
- what we can change.

In genetic terms, the results of tight management are bearing fruit.

CBV people are architects of change.

For commercial results... **off grass...**

44 years of super selection.

44 years with no tolerance of freeloaders.

Focused only on genetic progress. Always at low cost... always!

CBV - THE INTERNATIONAL BENCHMARK FOR BRAHMAN

Cows with * in the ICI column.

These are merit cows that failed to wean at CBV and continued to breed in daughter herds

Note regarding Polled, Scurred, or Horned in Catalogue.

Polled, Scurred and Horned status is confirmed by DNA for CBV, 1VV, LCL, RW and Copley bulls. The GEG polled/horned bulls are based on observation at branding.

notes

**Don't do your best;
do what is necessary!** Winston Churchill

F R E E D O M

Freedom is; not the ability to implement your whim.

Freedom is; taking on your responsibilities.

Responsibility is; Doing what you ought!

not embracing licence, not embracing entitlement.

Responsibility is;

Selecting the heaviest load you can,
to move it forward.

Maximum freedom.

Maximum responsibility.

Adoption of discipline.

"Of course you can do it boy!
Just keep getting stuck into it".
(Ken Rowan 1972 pregnancy testing at Wandilla)

notes

S.'23 LCL BULLS Category 3

Due to a late wet season resulting in a delayed muster at Red Rock Station, the S24 calving DNA data could not be submitted and returned in time for catalogue printing.

^ symbol on # CLVS, denotes the cow came in wet, indicating she raised an S24 calf, and so another calf can be added to the total number in the catalogue.

**Lara and Michael Conaghan - Red Rock Station,
EINASLEIGH Q 4871**

The significant problems we face
cannot be solved at the same level of thinking we were
at when we created them".

(Albert Einstein)

* Breed Mean Values

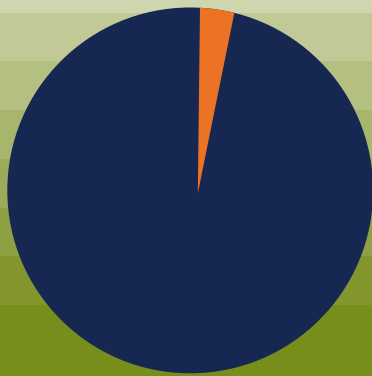

Simple Abundance

The simple abundance of key traits distinguishes CBV as the dominant Brahman breeder in Australia. 23 of the top 25 sires with progeny analysed for Days to Calving, are bred and/or owned by CBV Genetics Group.

Simply ask yourself the question... Why is it so? *Professor Julius Sumner Miller*

The Helen Newton Turner Medal

Alf Collins Snr, one of the most innovative beef cattle breeders in the world, was awarded the prestigious Helen Newton Turner Medal for 2017.

The Helen Newton Turner Medal perpetuates the memory of an outstanding sheep geneticist, and a fine Australian. The Medal is awarded to provide encouragement and inspiration to those engaged in animal genetics.

Building on the foundations established by his father, Alf Collins Snr has applied enormous dedication, careful recording and rigorous focus on breeding for profitability, to the continuous improvement of Brahman cattle in the Collins Belah Valley (CBV) herd.

Brahman cattle have to perform in very challenging environments, and breeding programs to deliver genetic improvement in those environments are challenging too - reflecting large scale of operations and variable climatic conditions.

Alf has met these challenges head on and collected performance records underpinning reliable EBVs and used the information backed by hard-nosed practical understanding of functionality and survival ability, to generate very impressive genetic progress over several decades. Perhaps the most outstanding aspect of that genetic progress is that it includes very substantial progress in female fertility - something that has effectively been treated as 'too hard' by most breeders of tropically adapted cattle world-wide. CBV has actively participated in industry R&D, including significant contributions to beef CRC I, II and III.

Alf is a deep thinker about what cattle need to do in the tropical environment, and has never been afraid to try novel approaches or include new traits if they will help breeding cattle better and better suited to the environment and to improving profit.

Alf continues to be an outstanding pioneer and innovator in real-world application of genetics technology, and the demonstration that it is possible to breed genetically fertile, productive and profitable tropically adapted cattle is an inspiration.

Alf Collins Snr received the Helen Newton Turner Medal at the Association for the Advancement of Animal Breeding and Genetics (AAABG) conference in Townsville, Queensland on Wednesday 5 July 2017 and delivered the Helen Newton Turner Oration following the presentation.
