

# Welcome

**ALF'S BULL SALE** 4 JULY 2020  
'Collins Belah Valley' | Marlborough, Queensland

A close-up photograph of a person's hands wearing grey work gloves. The person is using a black pen to write in a large, open ledger. The ledger page is filled with a grid of data, likely related to cattle breeding or sales. The grid has many columns and rows, with some cells containing numbers and others containing text. The background shows a blurred view of a farm with several cows in a paddock.

DATA... the guiding hand!

**40 years of quality, grass-raised genetics**  
**Fertile | Gentle | Growthy | Adapted**

# HELMSMAN ADAPTED SYSTEM

*Original Helmsman Bid System created by Bruce Milne.*

**Buying commercial herd bulls this way combines useful features from auction and private treaty systems. You have the opportunity to bid on, and buy any bull in the catalogue at a competitive market value without pressure.**

1. On arrival, intending purchasers register at the bid table and receive a Bid Number.
2. All bulls are penned for inspection, by category, as per the catalogue.
3. Opportunities abound. At 9am, all bulls are on the market simultaneously. You bid on any lot, regardless of catalogue sequence, by lodging a bid slip with a "runner". Having reached your price limit on a bull, you simply move onto your next selection of bulls anywhere in the catalogue.
4. From 9am buyers' opening bids will commence, starting at the base price written on the bidding boards. Further advances at a minimum bid value (as per the coloured schedule at right). There is no upper limit on the bids.
5. Bids are recorded on every bull, showing 'buyer number' and \$ value, on large boards, by category, in the central hub of the bull yards.
6. A bid, once submitted and recorded, is the responsibility of that bidder.
7. Coloured Timetable (see right).  
At set times during the day, bulls with no new bids for a set period, will be deemed sold, as per ink colour. This helps multiple buyers, by designated times, to know they have secured their tally. It also enables some clients to exit the sale by 2pm, confident that their purchases are secure.

## THE BENEFITS

**NO SPLIT-SECOND DECISIONS.** You have time to consider, to select and place deliberated bids on the entire catalogue.

By 1pm, buyers will know their core tallies with ample time to re-select other bulls, or advance bidding without auction pressure of instant decisions.

Re-selection is easy, as the yards are full of very similar genetics.

- 2 Buyers of groups of bulls with Helmsman gives broad choices, flexibility and time to average your budget.

**9am to 12 noon**  
Bids of **\$200** or higher.  
All bids will be recorded in **BLUE** pen

**12 noon to 1pm**  
Bids of **\$300** or higher.  
All bids will be recorded in **RED** pen

### At 1pm

Any bull price remaining in the original pen colour of **BLUE**, will be **deemed officially sold** for the amount listed to the buyer listed.

**1pm to 1.30pm**  
Bids of **\$400** or higher.  
All bids will be recorded in **GREEN** pen

### At 1.30pm

Any bull price remaining in the original pen colour of **RED**, will be **deemed officially sold** for the amount listed to the buyer listed.

**1.30pm to 1.45pm**  
Bids of **\$500** or higher.  
All bids will be recorded in **PURPLE** pen

### At 1.45pm

Any bull price remaining in the original pen colour of **GREEN**, will be **deemed officially sold** for the amount listed to the buyer listed.

### 1.45pm

Any bulls in **PURPLE** pen will be individually, verbally listed and further bids will be taken at this time in an open auction (to enable sale closure in reasonable time).

## Welcome to Belah Valley

...and Welcome to Simple Abundance.

### MAKING AN IMPACT WITH MANAGEMENT AND GENETICS

This is not just desirable, but a necessary cornerstone for any business. This is not a whim.

#### FREEDOM

**Freedom is not** the ability to implement your whim.

Freedom is; **taking on your responsibilities.**

Responsibility is; **Doing what you ought!**

Not embracing licence. Not embracing entitlement.

**Responsibility is;** Selecting the heaviest load you can. To move it forward...

Maximum freedom... maximum responsibility... adoption of discipline.

*(Jordan B Peterson, 2019)*

**CBV is a disciplined herd.**

**Our responsibility...  
40 years of focused  
management.**

### MARGINS AND SPEED, AT LOW COST

The cattle business is slow compared to other forms of agriculture.

Room to move? Certainly, yes.

**We all need to utilise this 'room to move'.  
We have a responsibility to pick up the tempo,  
and that is where CBV addresses our future.**

The real advantages in cattle production are that we never lose the whole crop - and we have some diversity in markets.

We can also build a business on land that has no other obvious use.

We can and do have a firm hand on 'cost of production' - a proven profit-maker.

These genetics at CBV are already futuristic - **at double and triple Breed Averages.**

**The key EBV's for progress are Days To Calving, \$\$JapOx, and \$\$LivEx.**

So... THE FUTURE IS IN YOUR HANDS NOW.

**You are at the sale.**

## SERIOUS BUSINESS, THE FUTURE

In fact we take the present very seriously too. In cattle, at least! That is our responsibility.

**That is why we measure and analyse so intensely.**

That is also why we make all of our historic data available and transparent.

Whilst being very serious, we have made the journey **fun, exciting, rewarding, and stimulating to others**. We aim to help where we can.

Today, in this catalogue the genetics represent 40 years of focused management - to **do whatever is required** to make an impact on our terms of trade, and growth.

**There is no doubt now, about these genetics with impact.**

Group Breedplan is a global analysis for Brahman cattle, and again this year, the list of the top 50 sires, proven by progeny analysis and high accuracy is interesting.

CBV bred and owns 40 of them, with 6 others bred entirely on CBV genetics.

**Hard to imagine, easy to see... \$\$EBV's**

## OUTSTANDING SIRES.

**POWERFUL...** CBV has used 26 sons of just one sire indexing in \$EBV terms;

JapOx \$\$93, LivEx \$\$90. He has led the global competency list for several years for 'Days to Calving' EBV's, currently DTC -34, as well as the \$\$ indices.

His mother first calved as a two year old., weaned 15 calves at 361 day intervals - and pregnant again. Rebreed rates of lots of his daughters, and now granddaughters, gives deep consolidation of data and analysis.

**PROLIFIC...** We have been mating 26 sons of the old poll bull also, that weaned 171 progeny from 9 weeks mated. This season S.'20, he sired 77 calves from four weeks mating.

He has 470 progeny to date, and more coming.

## A VALUABLE SIRE.

Last season, we mated around 120 sires, mostly in multiple joinings. Roughly 50% of our sires are polled or scurred, giving us some PP (homozygous poll) sons.

That poll gene test is less than perfect, so we do not publish this data.

All progeny in this sale have been DNA screened, for sires and Poll gene.

About a third of our sires work in daughter herds, and co-operator herds as well as CBV cows.

We welcome several of these satellite herds with bulls here today. My daughters herds are Victoria and Scott Finger, 1VV; Lara and Mick Conaghan, LCL; and Gemma and Bill Geiger, GEG; as well as Rick and Dianne Whittle, RW; and Tom & Marie Copley, Ej. brand.

Marie and Tom Copley have 90 bulls here too, their third year marketing here. Their family of James, Thomas, and Josephine are integral to their business, whilst involved in genomics, law, and journalism. Get to know them on sale day. The Copleys have used CBV sires and shared our management rigour for over 30 years.

We have also had the pleasure of working closely with Brett and Lyn Coombe and their daughters Georgie and Lara for the last eight years. We share ideas, genetics, encouragement, cattle and the joy of creating new profitable pathways. Last year, aged only 15, Georgie hitched a ride to Brisbane Ekka with Wendy Cole, taking her young bull RBS Toronto, winning Reserve Calf Champion at the National Brahman Feature Show. They blitzed the show! Judge Matt McCamley stated "This youngest calf has 103 cm EMA already; weight per day of age, and carcase in this calf is quite outstanding, He is a very correct calf, not extreme at all, very functional, an all round good young calf". I understand the judge acknowledged his EMA and Scrotal size per kg and per month of age were both comparatively superior to most of the bulls in the competition. In the same year, Lara Coombe represented Australia in China in equestrian competition aged just 13. Good ambassadors appear at all ages, so I hope you get to meet these modest young rising stars, to hear their stories first hand.

We are pleased to record that in each of those co-operator herds, tight management has resulted in amazingly similar EBV results to CBV.

Our group of family and friends, as herd managers, co-sellers, and co-operator herds, are a constant inspiration and of real substance. That gives me great satisfaction.

This year again we pledge an enormous thank-you to Rick and Dianne Whittle. Rick is valued amongst us, as a friend and valued client for well over 30 years.

He oversees our data collection, DNA logging, and analysis. A retired vet, with his valued Brahmans at Nerimbera and Gympie, his keen mind has never retired. It is sharper than ever, immersed in cattle, genetics, his marriage to the lovely Dianne, and to his church network. He is the regional coordinator in CQ of "Shed Happens" as well as grandfather and Christian mentor to many.

Again we honour Allan Isaak, with his wife Alison. Allan is a wonderful friend, and awesome graphic designer who has designed everything we have published since 1983 when he was fresh out of college. He has never lost his enthusiasm and pursuit of excellence. His dedication to his faith, and all-round excellence has no equal. As art director at Billabong in its heyday, Allan still made time to assist CBV. He is a dedicated family member among his mother and six siblings and takes a strong and nurturing role there. He has recently retired as Manager of Visual Communication Services at Queensland University of Technology, in marketing communication, design and creative services. That was true heavy lifting in that huge institution. They have two grown daughters with international experience in business and creative strategy, advertising and marketing. Get to know Allan and Alison, to make them welcome.

***'We have owned our wrong- turns and mistakes, and turned them into a pathway to discovery - great stepping stones for later success.'***

## ADAPTATION

The subject of **adaptation** is becoming better understood AND RESPECTED. Until recent times, most folks thought that this related only to tropical climate, resistant to, and tolerant of, insects and parasites. Opportunities are far greater than that.

At CBV we have long held the view that reproduction speed and survival was the true expression of adaptation, at low cost, with no chemical inputs, and high utilization of pastures and shrubs. The marathon runners in these traits are truly adapted. That philosophy has helped us find some extraordinary genetics. I am not going to list these, other than to observe that CBV cattle are leading the field by a long way in very significant numbers.

Never forget speed! Speed matters; to reproduce, to explode into muscle development, and fat finish when we often get short seasonal breaks. CBV cattle do this well, to grow and finish fast. Females need the ability to gain and store fat in order to function effectively.

CBV weaners have been on spinifex country the last four seasons, between Muttaborra and Prairie. Thank you Rob, Vickie, Shianne, Chicki, and Brand.

These cattle are no strangers to adversity; that qualifies them to be outstanding cattle in most circumstances. I am sure adversity is the maker of men, minds, and cattle too.

*'Not only so, but we also glory in our sufferings, because we know that suffering produces perseverance; perseverance, character; and character, hope'. Romans 5: 3-4*

*Look deeply into nature,  
and then you will understand  
everything better. (Einstein)*

Our family and extended family of co-operator herds have worked hard to breed and validate the data.

We have had the support of some wonderful minds in research and analysis. Professor D'Occhio lectures in Italy, Brasil, and Australia. Professor Kinder is back in Ohio, both whom you met in previous years at CBV. Together they have over 60 years of inputs here. Professor Pietro Baruselli and Gilberto Rubbo Pacheco in Brasil have been wonderful encouragement in Zebu cattle research and development too.

This year we welcome again Professor Ben Hayes, Director of QAAFI, at University of Queensland and Dr Bailey Engle from Montana. Ben has breathed a lot of the same dust as we have during the last three years. He is a great fit with his international knowledge and eminence in genomic research, with our search for more genetic competence at CBV. Dr Engle is deep into her second year of post-doctoral research with Ben, at UQ.

Bailey is a hands-on ranch-raised daughter of a ranching and down-stream beef processing and marketing family. Ben and Bailey have a great work ethic, supported by other brilliant minds in their team at Qld Alliance for Agriculture and Food Innovation.

Our great mentor of 50 years, Ken Rowan M.V.Sc, still maintains a super-keen interest in everything at CBV. Our friendship started in 1970, at the original Wandilla herd. Ken has always been a proponent of the importance of reproduction speed, and ways to achieve that. With the dynamic and analytic Ken Coombe as a neighbour and mentor, and Ken Rowan pregnancy testing, I had plenty of inspiration and

encouragement. Just down the road was Drs Vercoe and Frisch at CSIRO, and Tom Rudder at the DPI, and Hec Maynard was already using punch cards for early Brahman computerised herd records. Alan Rideout, in the same Callide Valley computerised his production records when they still ran on tapes! Inspirational, all.

I am mindful that there are no overnight successes or sureties in genetics, and remind our clients of the words of two of the nations leading geneticists, Hayes and Banks stating in recent times, ***'that without phenotypic rigour and tight management, the current genomic GBV's can turn to dust easily in 5 years!'***

That is why CBV publishes the full 4 generations of data on every bull for total transparency, integrity, and validation.

We have been privileged to have 40 years hands-on management at CBV; in very practical circumstances of low cost production, sieving out the dross. Never underestimate the value of cashing the freeloaders, quick! We are now well into our genomics phase. Phenotypic validation has been our key to progress for the first 37 years. Now we are three years stronger with our collaborative genomic research at QAAFI.

Although it is early days, we are seeing enough breakthroughs in genomics to drive us harder and deeper into powerful research. We are only interested in research that will help the profitability of practical cattle herds on grass. Mostly that is based on reproduction and survival at low operational cost. We will not be running to the media with half proven theories. We have seen evidence of that in the past. As we grow in validation, we will share the results. **7**

Maybe useful GBV's are the result of rigour and adversity? This has definitely been the results of the past. There has been no substitute for hard work and studious observation and measurement.

**I believe that the cream will always come to the top, not as mere specks, but en masse.**

In the future we hope that we can help validate what we find in the laboratory to reflect in our "in-field" application, and vice-versa. Collaboration is our mantra in research. The truth is a heady attractant.

Yearly I honour Mr Rod Deeth, Mathematician, who in my early understanding of Maths B stated "Look deeply into the theorem, understand how it works, then it's easy!" Mr Deeth could teach so clearly, and at age twelve, this wonderful teacher brought understanding to me for a lifetime. I know that I rarely wrote the theorems in concise textbook form, but he accepted my submissions in total. How valuable that was to my developing mind. I still keep in touch with Mr Deeth.

Phil Holmes and Ian McLean, assembled the best dossier ever, two years ago on the national cattle production businesses as The Australian Beef Report; I quote "there are no silver bullets in beef". I believe those two keen intellects have another book in the pipeline. I will commend it to you.

We again have inserted some useful charts in the back pages, of commercially significant traits that are "Profit Makers". By adopting the principles of low-cost tight management, plus adding proven genetics, clearly illustrates that significant gains can be made given time, thoughtfulness, encouragement, and **endurance**.

**'THERE ARE NO SILVER BULLETS IN BEEF'.**

**(Phil Holmes & Ian McLean,  
in The Australian Beef Report)**

We will not rest, in researching reproduction and associated fields that are key drivers of economic traits. We emphasise tight management.

Quoting Kit Pharo, of Colorado, 'Make sure you get your bulls from a guy who raises them like you ought to'. From tougher conditions than you have, sure helps.

**CBV genetics are herd-changers; and our pace is picking up. Speed matters.**

I do not want to sound proscriptive, because I realise that only you know your full circumstances and capacity. But on the other hand, we can, as individuals, profit from a gentle nudge down a new or innovative pathway sooner rather than later.

Our intention is to help you, respectfully, to grow, build, and innovate, and we take that intent very seriously.

We did not create these cattle; we just manage the genetic marathon to discover and utilise them.

Every day I thank God for His compass, for my energetic family, our close friends, our cattle, and the opportunity to explore them, develop them, and to share them.

Thank you for your continual support, joining CBV in this 'simple abundance'.

Sincerely, Alf Collins at CBV.

*'Winston S. Churchill drove the point well...*

# DISCOVERY...

## CBV THE BREED WITHIN A BREED

***High efficiency Brahmans. Adapted beef cattle. No doubt about it.***

CBV has **never** tried to prop up our search for meaningful genetics by light stocking rates, rich diets, or extraordinary country.

**We do find true marathon runners in genetic terms.**

Our weaners live on spinifex country between Muttaborra and Prairie. Bulls live there until Sale time. Heifers live there until mating, then onto basic granite country at Marlborough at 2 years old.

CBV stocks days per hectare per 100 mm are quite extreme.

CBV 'speed bands' for mating are illustrative and transparent. (C1 to C5 digitally)  
Speed Bands are; Alpha, Bravo, Charlie, Delta, and Echo, in phonetics - the ABC of genetics at work on grass.

**Learn more about these ABC structures by calling CBV.**

**There are no shortcuts, no quick fixes - more a matter of doing lots of small things well... Relentlessly!**

So... CBV focuses on

- what we can influence,
- what we can change.

In genetic terms, the results of tight management are bearing fruit.

**CBV people are architects of change.**

For commercial results... **off grass.**

40 years of super selection.

40 years of no tolerance of freeloaders.

Forever, it seems - dedicated to purpose.

**THE INTERNATIONAL BENCHMARK FOR THE BREED.**

**Note regarding Polled, Scurred, or Horned in Catalogue.**

Polled, Scurred and Horned status is confirmed by DNA for CBV, 1VV and Copley bulls. The LCL, GEG and RW polled/horned bulls are based on observation at branding.

### S.'19 Mature Sires - Scrotal Size EBV

## The Helen Newton Turner Medal

**Alf Collins Snr, one of the most innovative beef cattle breeders in the world, was awarded the prestigious Helen Newton Turner Medal for 2017.**

The Helen Newton Turner Medal perpetuates the memory of an outstanding sheep geneticist, and a fine Australian. The Medal is awarded to provide encouragement and inspiration to those engaged in animal genetics.

Building on the foundations established by his father, Alf Collins Snr has applied enormous dedication, careful recording and rigorous focus on breeding for profitability, to the continuous improvement of Brahman cattle in the Collins Belah Valley (CBV) herd.

Brahman cattle have to perform in very challenging environments, and breeding programs to deliver genetic improvement in those environments are challenging too - reflecting large scale of operations and variable climatic conditions.

Alf has met these challenges head on and collected performance records underpinning reliable EBVs and used the information backed by hard-nosed practical understanding of functionality and survival ability, to generate very impressive genetic progress over several decades. Perhaps the most outstanding aspect of that genetic progress is that it includes very substantial progress in female fertility - something that has effectively been treated as 'too hard' by most breeders of tropically adapted cattle world-wide. CBV has actively participated in industry R&D, including significant contributions to beef CRC I, II and III.

Alf is a deep thinker about what cattle need to do in the tropical environment, and has never been afraid to try novel approaches or include new traits if they will help breeding cattle better and better suited to the environment and to improving profit.

Alf continues to be an outstanding pioneer and innovator in real-world application of genetics technology, and the demonstration that it is possible to breed genetically fertile, productive and profitable tropically adapted cattle is an inspiration.

Alf Collins Snr received the Helen Newton Turner Medal at the Association for the Advancement of Animal Breeding and Genetics (AAABG) conference in Townsville, Queensland on Wednesday 5 July 2017 and delivered the Helen Newton Turner Oration following the presentation.
