# HELMSMAN ADAPTED SYSTEM

*Original Helmsman Bid System created by Bruce Milne.*

**Buying commercial herd bulls this way combines useful features from auction and private treaty systems. You have the opportunity to bid on, and buy any bull in the catalogue at a competitive market value without pressure.**

1. On arrival, intending purchasers register at the bid table and receive a Bid Number.
2. All bulls are penned for inspection, by category, as per the catalogue.
3. Opportunities abound. At 9am, all bulls are on the market simultaneously. You bid on any lot, regardless of catalogue sequence, by lodging a bid slip with a "runner". Having reached your price limit on a bull, you simply move onto your next selection of bulls anywhere in the catalogue.
4. From 9am buyers' opening bids will commence, starting at the base price written on the bidding boards. Further advances at a minimum bid value (as per the coloured schedule at right). There is no upper limit on the bids.
5. Bids are recorded on every bull, showing 'buyer number' and \$ value, on large boards, by category, in the central hub of the bull yards.
6. A bid, once submitted and recorded, is the responsibility of that bidder.
7. Coloured Timetable (see right).  
At set times during the day, bulls with no new bids for a set period, will be deemed sold, as per ink colour. This helps multiple buyers, by designated times, to know they have secured their tally. It also enables some clients to exit the sale by 2pm, confident that their purchases are secure.

## THE BENEFITS

**NO SPLIT-SECOND DECISIONS.** You have time to consider, to select and place deliberated bids on the entire catalogue.

By 1pm, buyers will know their core tallies with ample time to re-select other bulls, or advance bidding without auction pressure of instant decisions.

Re-selection is easy, as the yards are full of very similar genetics.

Buyers of groups of bulls with Helmsman gives broad choices, flexibility and time to average your budget.

## 9am to 12 noon

Bids of **\$200** or higher.  
All bids will be recorded in **BLUE** pen

## 12 noon to 1pm

Bids of **\$300** or higher.  
All bids will be recorded in **RED** pen

### At 1pm

Any bull price remaining in the original pen colour of **BLUE**, will be **deemed officially sold** for the amount listed to the buyer listed.

## 1pm to 1.30pm

Bids of **\$400** or higher.  
All bids will be recorded in **GREEN** pen

### At 1.30pm

Any bull price remaining in the original pen colour of **RED**, will be **deemed officially sold** for the amount listed to the buyer listed.

## 1.30pm to 1.45pm

Bids of **\$500** or higher.  
All bids will be recorded in **PURPLE** pen

### At 1.45pm

Any bull price remaining in the original pen colour of **GREEN**, will be **deemed officially sold** for the amount listed to the buyer listed.

## 1.45pm

Any bulls in **PURPLE** pen will be individually, verbally listed and further bids will be taken at this time in an open auction (to enable sale closure in reasonable time).

## GO FOR GOLD!

welcome

## ...and welcome again to simple

### Solutions are aplenty if you look for 'em...

- First step is realise we have lots to change in production and management.
- Accept that reproduction rates per hectare per 100 mm can always improve.
- Acknowledge the free-loaders in the herd 'have gotta go'.
- Be determined not to keep on producing the same failures.
- Load the cow herd up with bulls worthy of the 'Herd Changer' label.
- Manage in a style worthy of your inputs and ambitions.

Seems to me that adapted cattle are the worthwhile target. Adapted spells 'Low Cost'.

Truly adapted cattle will ...

**...reproduce through thick and thin.  
On time... every time!!!**

***Now that is a real challenge... every year, for every one owning cattle in northern australia.***

### ***Certainly, that is the case for CBV.***

We are investing now into our fifth decade developing genetics and management solutions to the most obvious needs in our beef business.

At CBV we have long held the view that reproduction speed and survival is the true expression of Adaptation, at low cost, and high utilisation of pastures and shrubs.

The 'marathon runners' in these traits are truly adapted.

Never forget speed!.. Speed matters; to reproduce, to explode into muscle development, and fat finish when we have short seasonal breaks. Females need the ability to gain and store fat in order to function effectively. CBV cattle do this well, to grow and finish fast.

abundance!

2021

***CBV genetics are herd-changers; and our progress is accelerating. Speed matters!!!***

In 1985 Dr Vercoe of CSIRO introduced us to the fertile mind of the young Michael D'Occhio. Professor D'Occhio with his global reach, has been a constant inspiration in our search for reproduction efficiency in adapted cattle ever since. The mystery of the CBV genetic effect has captured the energy of Professor Ben Hayes from 2016, and our commitment in collaboration strengthens this genomic thread. THE TRUTH IS A HEADY ATTRACTANT.

The subject of uterine survival has been high on the CBV agenda for many years.

When we consider that from day 7 to day 17, in a healthy herd, conception losses occur in the range of 30% to 50% by failing to attach to the endometrium, or uterine lining, thus failing to establish a healthy full-term pregnancy.

From 1996, CBV herds were sorted into monthly calving 'Speed Bands' to illustrate in practical terms this difference in reproduction efficiency. Initially we analysed on Excel spreadsheets, seeking the super re-breeders.

***They do exist, fast and reliable. Endurance matters...***

Subsequent development of DTC Days to Calving EBV's have delivered without doubt a valuable tool and part solution, speeding up our genetic progress.

Further genomic studies, to which we are totally committed, along with reproduction science and endocrinology all help CBV in our hunt for practical solutions in science.

*Look deeply into nature,  
and then you will understand  
everything better. (Einstein)*

This raises the subject of epigenes , and the triggering of these genes into expression; we have proposed that adversity brings out the best in all living things.

These cattle are no strangers to adversity; that qualifies them to be outstanding cattle in most circumstances. I am sure adversity is the maker of men, minds, and cattle too. (Romans 5: 3-4).

I am mindful that there are no overnight successes or sureties in genetics, and remind our clients the words two of the nations leading geneticists, Hayes and Banks stating in recent times, that without phenotypic rigour and tight management, the current genomic GBV's can turn to dust easily in 5 years. That is why we publish the full four generations of data on every bull for total transparency, integrity, and validation.

## ***Our responsibility... 41 years of focused management.***

We have been privileged to have 41 years hands-on management in CBV, in very practical circumstances of low cost production, sieving out the dross. Never underestimate the value of cashing the freeloaders quickly. Phenotypic validation has been our key to progress for the first 37 years. Now we are four years stronger with our collaboration at QAAFI in genomic research.

Although it is early days, we are seeing enough breakthroughs in genomics to drive us harder and deeper into powerful research. We are only interested in research that will help the profitability of practical cattle on grass. That is reproduction and survival at low operational cost.

I believe that the cream will always come to the top, not as mere specks, but en masse, with strong management.

Yearly I honour Dr Rod Deeth, Mathematician, who in my early understanding of Maths B stated "Look deeply into the theorem, understand how it works, then it's easy." Mr Deeth could teach so clearly, and at age twelve, this wonderful teacher brought understanding to me for a lifetime.

I rarely wrote the theorems in concise text book form, but he accepted my submissions in total.

Mr Deeth was of monumental value to my developing mind. I still keep in touch with Mr Deeth.

CBV genetics are herd-changers; and our progress is accelerating. Speed matters!!!

I do not want to sound proscriptive, as I realise only you know your circumstances and capacity.

But on the other hand, we can as individuals profit from a gentle nudge down a new or innovative pathway sooner rather than later. Our intention is to help you, respectfully, to grow, build, and innovate, and we take that intent very seriously.

## ***THE HUNT IS ON...***

***Hunt for what is important...***

***Rising land prices demand  
higher returns.***

***Reproduction speed drives  
profit. No doubt, no debate.***

***Hunt for Repro!!***

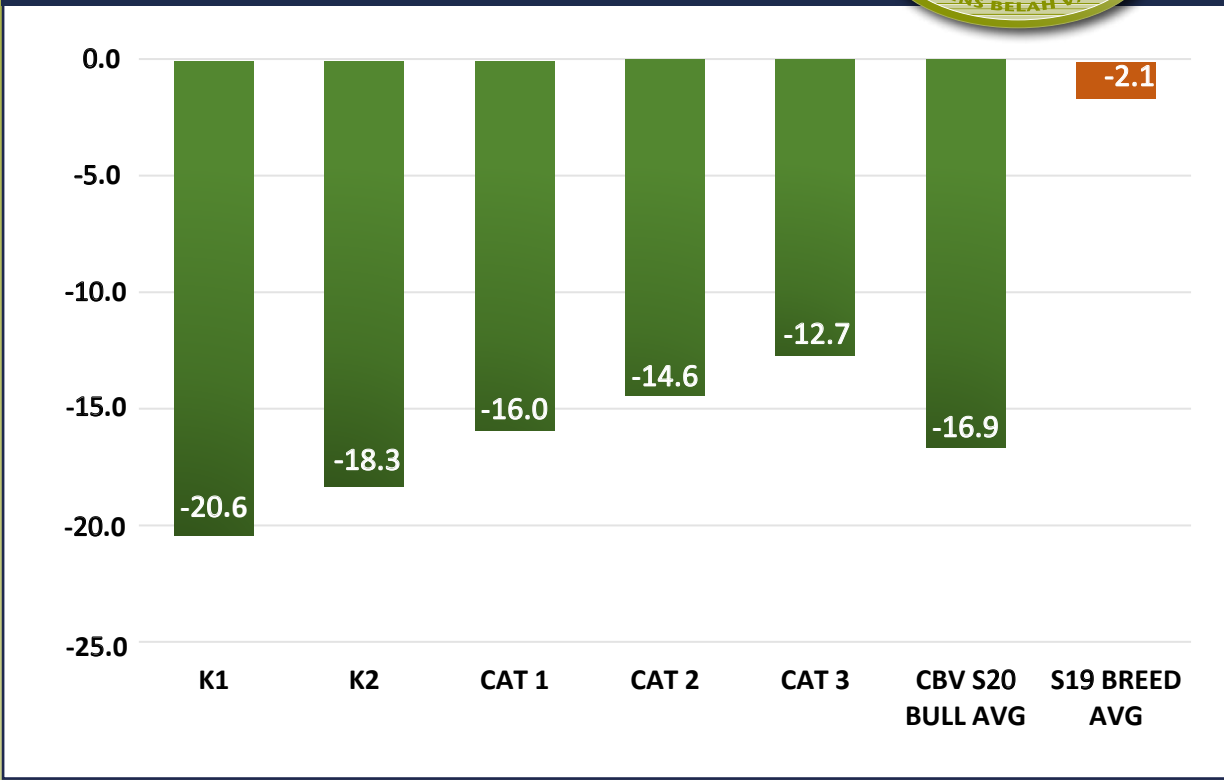

We did not create these amazing cattle; we simply manage the genetic marathon to discover and utilise them. Every day I thank God for His compass, for my energetic family, our close friends, our cattle, and the opportunity to explore them, develop them, and to share them.

*Thank you for your continual support,  
joining CBV in this 'simple abundance'.*

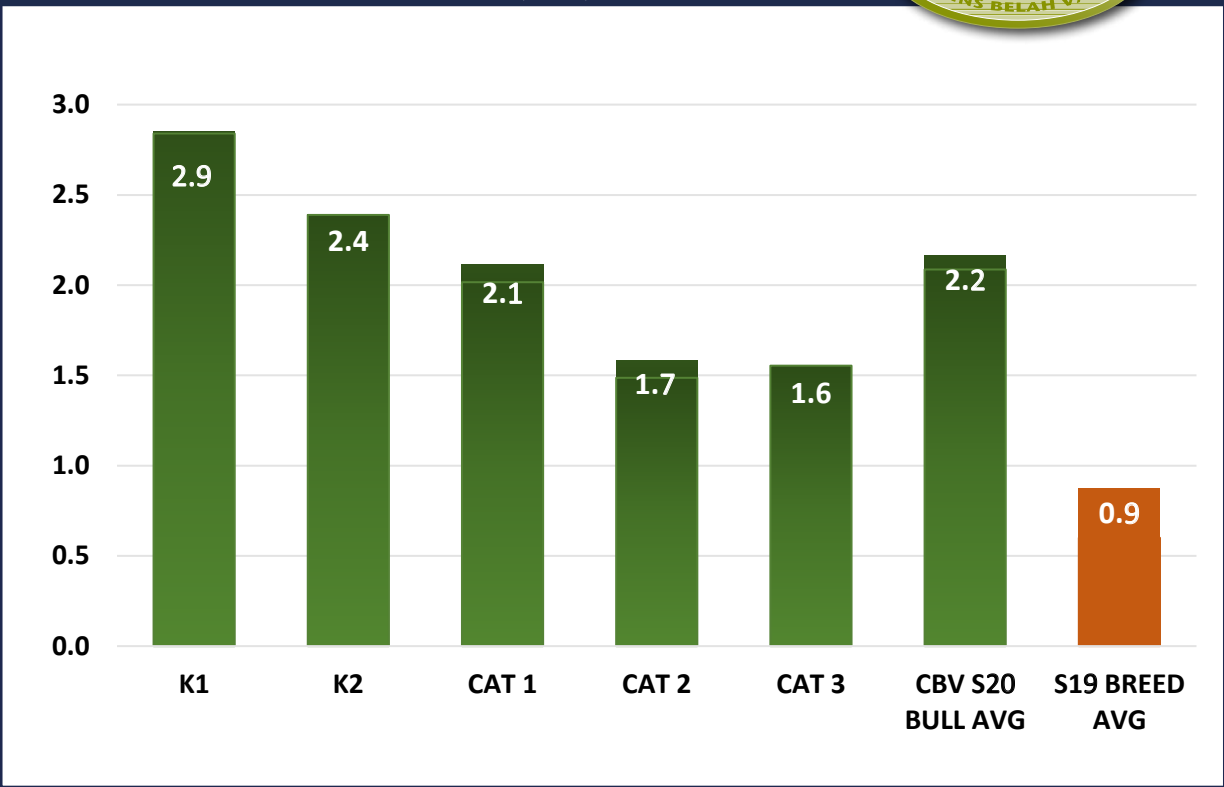

*Sincerely, Alf Collins Snr, at CBV*

# DISCOVERY...

## CBV THE BREED WITHIN A BREED

---

***High efficiency Brahmans. Adapted beef cattle. No doubt about it.***

CBV has **never** tried to prop up our search for meaningful genetics by light stocking rates, rich diets, or extraordinary country.

**We do find true marathon runners in genetic terms.**

LCL cattle live on spinifex country between Muttaborra and Prairie.

All other vendor's cattle including Heifers on coastal country this year.

CBV stocks days per hectare per 100 mm are quite extreme.

CBV 'speed bands' for mating are illustrative and transparent. (C1 to C5 digitally)  
Speed Bands are; Alpha, Bravo, Charlie, Delta, and Echo, in phonetics - the ABC of genetics at work on grass.

**Learn more about these ABC structures by calling CBV.**

**There are no shortcuts, no quick fixes - more a matter of doing lots of small things well... Relentlessly!**

So... CBV focuses on

- what we can influence,
- what we can change.

In genetic terms, the results of tight management are bearing fruit.

**CBV people are architects of change.**

For commercial results... **off grass.**

41 years of super selection.

41 years of no tolerance of freeloaders.

Forever, it seems - dedicated to purpose.

**CBV - THE INTERNATIONAL BENCHMARK FOR BRAHMAN**

**Note regarding Polled, Scurred, or Horned in Catalogue.**

Polled, Scurred and Horned status is confirmed by DNA for CBV, 1VV and Copley bulls.  
The LCL, GEG and RW polled/horned bulls are based on observation at branding.

**S.'20 CBV BULLS**

# Simple Abundance

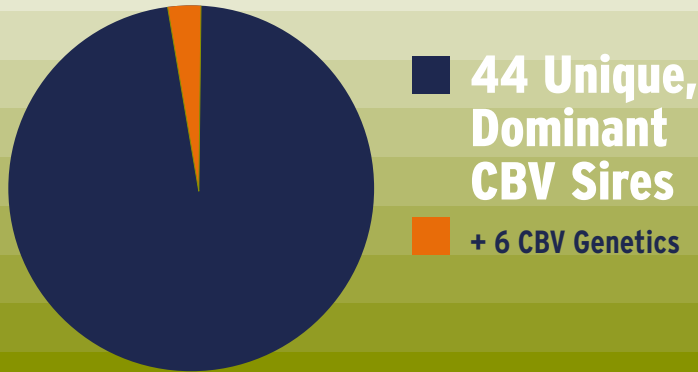

The simple abundance of key traits distinguishes CBV as the dominant Brahman breeder in Australia.

44 of the top 50 sires with progeny analysed, bred and owned by CBV.

**Simply ask yourself the question... Why is it so?** *Professor Julius Sumner Miller*

## The Helen Newton Turner Medal

**Alf Collins Snr, one of the most innovative beef cattle breeders in the world, was awarded the prestigious Helen Newton Turner Medal for 2017.**

The Helen Newton Turner Medal perpetuates the memory of an outstanding sheep geneticist, and a fine Australian. The Medal is awarded to provide encouragement and inspiration to those engaged in animal genetics.

Building on the foundations established by his father, Alf Collins Snr has applied enormous dedication, careful recording and rigorous focus on breeding for profitability, to the continuous improvement of Brahman cattle in the Collins Belah Valley (CBV) herd.

Brahman cattle have to perform in very challenging environments, and breeding programs to deliver genetic improvement in those environments are challenging too - reflecting large scale of operations and variable climatic conditions.

Alf has met these challenges head on and collected performance records underpinning reliable EBVs and used the information backed by hard-nosed practical understanding of functionality and survival ability, to generate very impressive genetic progress over several decades. Perhaps the most outstanding aspect of that genetic progress is that it includes very substantial progress in female fertility - something that has effectively been treated as 'too hard' by most breeders of tropically adapted cattle worldwide. CBV has actively participated in industry R&D, including significant contributions to beef CRC I, II and III.

Alf is a deep thinker about what cattle need to do in the tropical environment, and has never been afraid to try novel approaches or include new traits if they will help breeding cattle better and better suited to the environment and to improving profit.

Alf continues to be an outstanding pioneer and innovator in real-world application of genetics technology, and the demonstration that it is possible to breed genetically fertile, productive and profitable tropically adapted cattle is an inspiration.

Alf Collins Snr received the Helen Newton Turner Medal at the Association for the Advancement of Animal Breeding and Genetics (AAABG) conference in Townsville, Queensland on Wednesday 5 July 2017 and delivered the Helen Newton Turner Oration following the presentation.

**AGBU Media Release 2 July 2017**

# The breed within a breed

**There are no shortcuts, no quick fixes –  
more a matter of doing lots of small  
things well... Relentlessly!**

**“Every CBV cow has weaned a calf by  
March... EVERY YEAR.”  
Easy to say, difficult to do...Genetics at work!**

**CBV focuses on what we can influence,  
what we can change. In genetic terms,  
the results of tight management are bearing fruit.**
