BULL SALE

22 August 2025

HELMSMAN ADAPTED SYSTEM

Original Helmsman Bid System created by Bruce Milne.

Buying commercial herd bulls this way combines useful features from auction and private treaty systems. You have the opportunity to bid on, and buy any bull in the catalogue at a competitive market value without pressure.

1. On arrival, intending purchasers register at the bid table and receive a Bid Number.
2. All bulls are penned for inspection, by category, as per the catalogue.
3. Opportunities abound. At 9am, all bulls are on the market simultaneously. You bid on any lot, regardless of catalogue sequence, by lodging a bid slip with a "runner". Having reached your price limit on a bull, you simply move onto your next selection of bulls anywhere in the catalogue.
4. From 9am buyers' opening bids will commence, starting at the base price written on the bidding boards. Further advances at a minimum bid value (as per the coloured schedule at right). There is no upper limit on the bids.
5. Bids are recorded on every bull, showing 'buyer number' and \$ value, on large boards, by category, in the central hub of the bull yards.
6. A bid, once submitted and recorded, is the responsibility of that bidder.
7. Coloured Timetable (see right).
At set times during the day, bulls with no new bids for a set period, will be deemed sold, as per ink colour. This helps multiple buyers, by designated times, to know they have secured their tally. It also enables some clients to exit the sale by 2.30pm, confident that their purchases are secure.

THE BENEFITS

NO SPLIT-SECOND DECISIONS. You have time to consider, to select and place deliberated bids on the entire catalogue.

By 1pm, buyers will know their core tallies with ample time to re-select other bulls, or advance bidding without auction pressure of instant decisions.

Re-selection is easy, as the yards are full of very similar genetics.

Buyers of groups of bulls with Helmsman gives broad choices, flexibility and time to average your budget.

9am to 12 noon

Bids of **\$200** or higher.
All bids will be recorded in **BLUE** pen

12 noon to 1.00pm

Bids of **\$300** or higher.
All bids will be recorded in **RED** pen

At 1pm

Any bull price remaining in the original pen colour of **BLUE**, will be **deemed officially sold** for the amount listed to the buyer listed.

Lunch 1.00pm to 1.30pm

All bidding will be suspended while we enjoy some lunch.

1.30pm to 2.00pm

Bids of **\$400** or higher.
All bids will be recorded in **GREEN** pen

At 2.00pm

Any bull price remaining in the original pen colour of **RED**, will be **deemed officially sold** for the amount listed to the buyer listed.

2.00pm to 2.30pm

Bids of **\$500** or higher.
All bids will be recorded in **PURPLE** pen

At 2.30pm

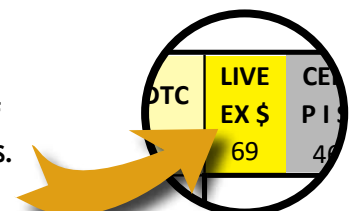

Any bull price remaining in the original pen colour of **GREEN**, will be **deemed officially sold** for the amount listed to the buyer listed.

At 2.30pm

Any bulls in **PURPLE** pen will be individually, verbally listed and further bids will be taken at this time in an open auction (to enable sale closure in reasonable time).

GO FOR GOLD!

CBV Terms and Conditions of Entry and Sale | 21-22 August, 2025.

CBV will invoice after the sale, with payment due up to 30 days from invoice date.

All bulls are sold as herd bulls for commercial use only, and not seed stock use.

All semen rights remain solely with the vendors.

Freight cost, insurance and NLIS transfers are the responsibility of purchasers.

Sale format: Helmsman bid system.

Delivery: CBV will help coordinate delivery of joint loads where possible.

CBV takes no responsibility for bulls in transit.

Injury to persons or property: All persons attending the sale do so at their own risk, and the sale principals assume no liability or responsibility, legal or otherwise, for any accident or injury that may occur.

Thank you for blessing us with your presence and participation at CBV.

Designed and produced by Allan Isaak

Welcome

OUR OPEN DAY is a good start to share the abundance of progress and substance God has blessed us with.

We have respected this abundance by carefully recording developments for 45 years.

People, cattle, land, science, and management are integral expressions of progress.

That sounds easy in one sentence; in behind this simple abundance is a complex matrix.

Our CBV Sire Summary is represented by key production graphs for Days to Calving EBV's and LivEx\$ index.

We are listing over 200 bulls mated in the current '24 & '25 mating years, with really strong representation in the top 1% for DTC (Days to Calving) 76 sires, and LivEx\$ EBV's, 57 sires.

All matings are multi-sired, with six to twenty bulls per herd. CBV uses the big 50 SNP chip for genetic accuracy.

These are powerful in numbers. Not one, or two, or ten leading sires - Hundreds.

This result is not an accident of Nature; but achieved by measuring and multiplying what resides in virtually any population.

Using commonsense and science is a natural fit for CBV management.

Charts outlining this interesting trajectory of economic drivers show domination of the gene pool, simply developed quietly by CBV, hunting for traits that truly make a difference to economics in beef production.

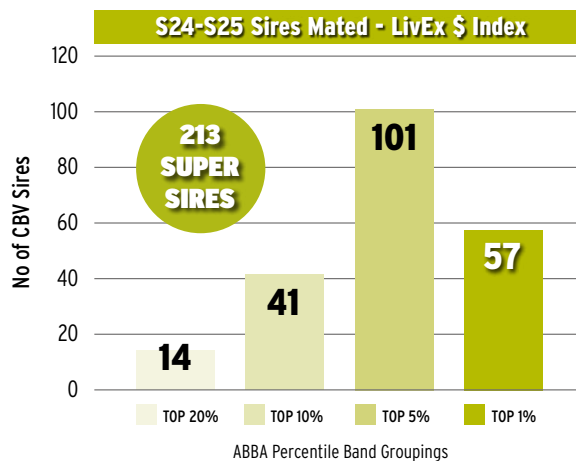

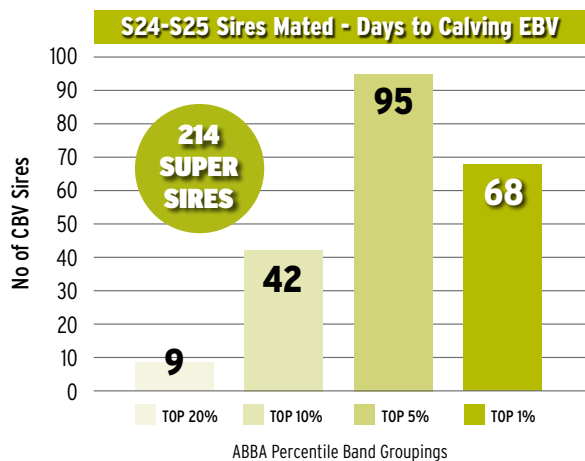

2025

Using commonsense
and science is a
natural fit for CBV
management.

Simple abundance...

Northern Australia in adversity is where these genes initially were discovered, and amplified.

Notably a combination of grazing pressure, and strict reproduction parameters has been our fastest route.

We were hunting for the outliers that exist in all populations. **We found them.**

CBV had the necessary management to sieve off the best and trash the rest.

Our policy of “no freeloaders” has largely borne fruit of a rare kind.

This program has had wonderful scientific inspiration and ongoing stimulation.

CBV has been blessed with inspiration and example from many continents.

Brilliant science and stellar practical cattle breeders have equally contributed to our trajectory.

Overarching all of this is our appreciation of God’s grace, in creating people, livestock and nature and His harmony in bringing it all together.

In 1981 CBV embraced the significance of reproduction reliability and its effect on nett earning capacity per land unit or dollar invested. You may marvel at the seemingly simplistic approach.

Yet we can now assess the results, utilising modern tools of BLUP (Best Linear Unbiased Prediction), analysis with Breedplan, and genomic analysis, for key profit indicators.

The ABBA initiated single step Breedplan analysis in 2017, a world-first for beef cattle.

This in no small way was developed from 2012 to 2017 from ‘concept to reality’ by ABBA General Manager John Croaker. Dairy herds with their precise measuring of production and cost controls led the way **globally**. The Australian Brahman Breeders Association embraced this excellent technology quickly. I give great honour to John Croaker, intelligent, tenacious, persistent and persuasive, similarly with his Treasurer Brett Coombe.

Bretts father Ken Coombe was a great advocate of analysis and transparency of reproduction records from way back in the 1960’s.

Mr Coombe served the Brahman breed totally for his lifetime, in many capacities. I am certain that the role of his wife Jan’s contribution was integral to his dedication and success.

Mr and Mrs Lionel DeLandelles of Cherokee Brahman had no equal in earlier years, building a huge genetic legacy for Australian Brahman, including building 40 feed efficiency stalls in 1961.

We must never forget these people who got things done.

Whilst honouring some of the legends of the past, we must continually challenge the future of the Brahman breed.

The hunt for truly meaningful economic results has long been the study of Emeritus Professor Michael D’Occhio, inspired by his understanding of endocrinology and reproduction physiology and its immutable linkage to profit.

"We have been blessed with 40 years of his brilliance, integrity, and encouragement," Mr Collins said.

"We give great tribute to Michael D'Occhio, along with Professors Jim Kinder, Pietro Baruselli, Guiseppe Campanile, and Antonio Limone; all collaborators and mentors across four continents.

"These highly qualified thinkers and researchers understand the hunt for fertility-driven profits, underpinned by their realm of science.

"They continue to collaborate and seek new and innovative pathways for the betterment of livestock production."

Prof Ben Hayes, and Prof Mike Goddard made great progress in dairy cattle genomics, in a global sense, and latterly in collaborative research with CBV fertility research.

"What is truly adapted?"... It is all about seeking profit in the grazing business, by function. The Eureka Moment is always based on adaptation and reproduction competence, at low cost.

Adapted cattle are certainly the CBV answer, in our hunt for higher production and lower costs. That is,

kg per hectare per 100mm of rain, and pregnant on time, every time. Trash the rest... Cash Flow.

Reproduction has always been the key to economic progress in northern Australia. With such a broad disparity between the average and the best seed-stock, we think the field is wide open for **big leaps in productivity** in the breeder herds of Northern Australia.

I am encouraging more Brahman breeders to participate enthusiastically in this exciting journey, by conscientious measurements and analysis.

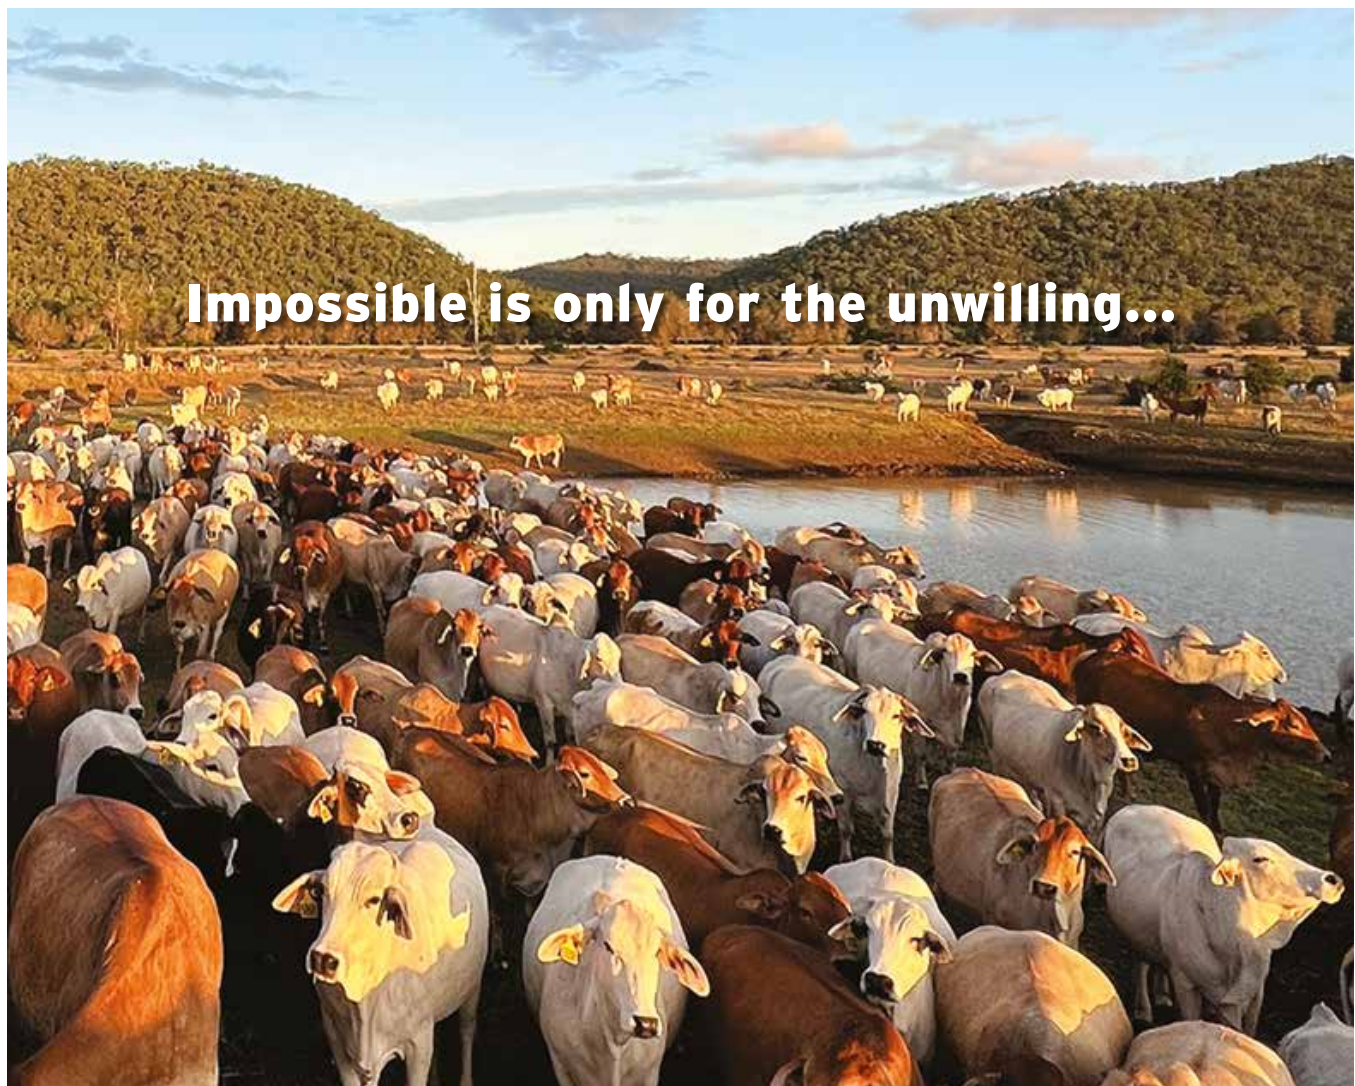

This is the future for the breed!

CBV will certainly continue to shoulder some of the load to break new ground in genetic and commercial progress.

We have illustrated by simple example during four decades that great things are possible.

Commonsense demands the relevance of more than single trait selection.

Cattle with quiet temperament, quick-fleshing, thrifty and athletic cattle have always been on our agenda.

CBV has no interest in the Revolving Door 'cosmetic' high-maintenance cattle that come and go in the fashion stakes that most breeds revolve through. Brahmans have mostly been caught up in this expensive circus too.

CBV chose the different road. Our policy of 'no freeloaders' has borne **fruit of a rare kind**. Valuable information.

Ignore the cost of production at your peril.

Two charts for meat consumption, and real prices are worthy of your study. These represent four species for fifty years, valuable information also.

This has every chance of influencing profit in anyone's herd.

It is my intention that what thoughts and examples we have shared here can be illustrative and encouraging to all who care to read and digest the substance herein. There is no 'silver bullet'; more like doing lots of small things well and consistently. Probably a lot like commonsense and hard work. That sure is fun.

Common sense is irreplaceable.

In my own case, I know how much I have benefited from gentle but persuasive encouragement to the next level of thinking, by respectful friends and mentors.

Practical men and women, and brilliant scientists in many countries, have gone out of their way to stimulate our enquiring minds; sharing their lifelong experiences.

My respect for the strength, courage, kindness, faith and example set by my wonderful parents in retrospect, still grows. Blessings abound in this simple abundance.

This journey certainly has been fun personally, and the future looks like...**"Let's get into it!"**

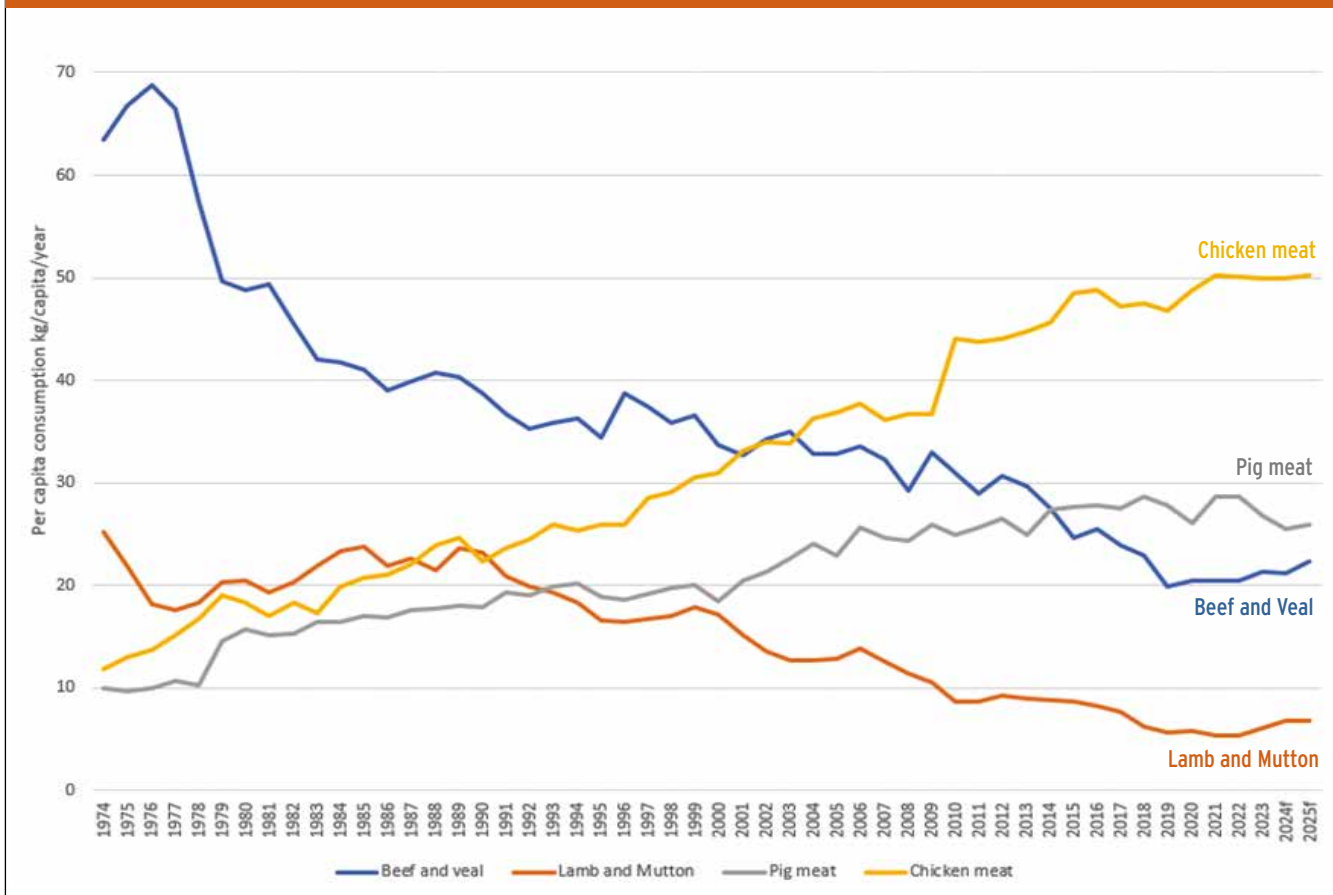

Sincerely,

Alf Collins CBV

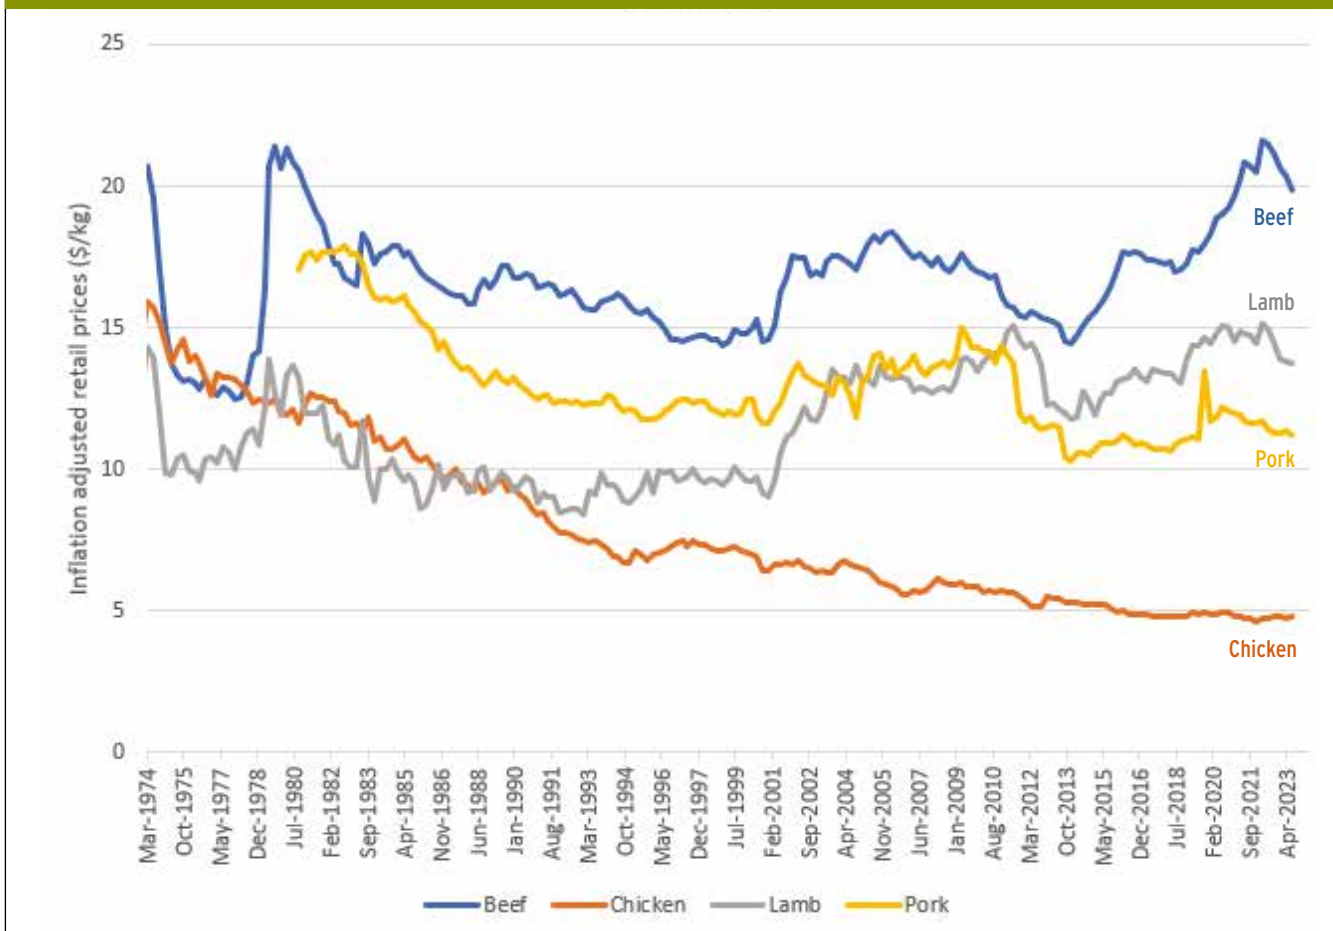

'Let us not become weary in doing good, for at the proper time we will reap a harvest if we do not give up' Galatians 6:9

DISCOVERY...

CBV THE BREED WITHIN A BREED

High efficiency Brahmans. Adapted beef cattle. No doubt about it.

CBV has **never** tried to prop up our search for meaningful genetics by light stocking rates, rich diets, or extraordinary country.

We do find true marathon runners in genetic terms.

All other vendor's cattle including heifers on coastal country, except LCL herd, located in the Gulf, North Queensland.

CBV stock-days per hectare per 100 mm are quite extreme.

CBV 'speed bands' for mating are illustrative and transparent. (C1 to C5 digitally)
Speed Bands are; Alpha, Bravo, Charlie, Delta, and Echo, in phonetics - the ABC of genetics at work on grass.

Learn more about these ABC structures by calling CBV.

There are no shortcuts, no quick fixes – more a matter of doing lots of small things well... Relentlessly!

So... CBV focuses on

- what we can influence,
- what we can change.

In genetic terms, the results of tight management are bearing fruit.

CBV people are architects of change.

For commercial results... **off grass...**

45 years of super selection.

- 45 years with no tolerance of freeloaders.

Focused only on genetic progress. Always at low cost... always!

CBV - THE INTERNATIONAL BENCHMARK FOR BRAHMAN

Cows with * in the ICI column.

These are merit cows that failed to wean at CBV and continued to breed in daughter herds

Note regarding Polled, Scurred, or Horned in Catalogue.

Polled, Scurred and Horned status is confirmed by DNA for CBV, 1VV, LCL, RW. The GEG polled/horned bulls are based on observation at branding.

notes

F R E E D O M

Freedom is; not the ability to implement your whim.

Freedom is; taking on your responsibilities.

Responsibility is; Doing what you ought!
not embracing licence, not embracing entitlement.

Responsibility is;
Selecting the heaviest load you can,
to move it forward.

Maximum freedom.
Maximum responsibility.
Adoption of discipline.

CAT 2

S.'24 CBV BULLS

Category 2

**"Of course you can do it boy!
Just keep getting stuck into it".**

(Ken Rowan 1972 pregnancy testing at Wandilla)

S. '24 GEG BULLS

Categories 1, 2 and K2

NB. We have TWO PENS this year.

The bulls in the CT pen (Castle Tower) were weaned later and in a good agistment paddock, (plenty of milk), (weighing between 140 to 220kg at weaning),

WHEREAS the bulls in the B pen, were weaned earlier as they were on agistment in a very deficient/dry paddock (weighing between 50kg-112kg).

The first calf heifers had a rough year, so any '21-G__ Dams that have had more that 1 calf were absolute champions, as some first year calvers didn't even live to wean their calves.

HORN STATUS is done by eye, not DNA

Gemma and Bill Geiger - 'Oaklands'

1349 Bracewell Road Mt Larcom Q 4695

Category 2

The # calves and ICI are from before breeders moved to Red Rock.

The ^ symbol on # calves, denotes the consecutive years the cow has come in wet within our breeding window, representing the additional calves she has weaned at Red Rock Station - holding each cow accountable to produce in our northern production system on-time each year.

Lara and Michael Conaghan - Red Rock Station,
EINASLEIGH Q 4871

Significant Sires List

The significant problems we face
cannot be solved at the same level of thinking
we were at when we created them".

(Albert Einstein)

SIGNIFICANT SIRE'S LIST

* Breed Mean Values

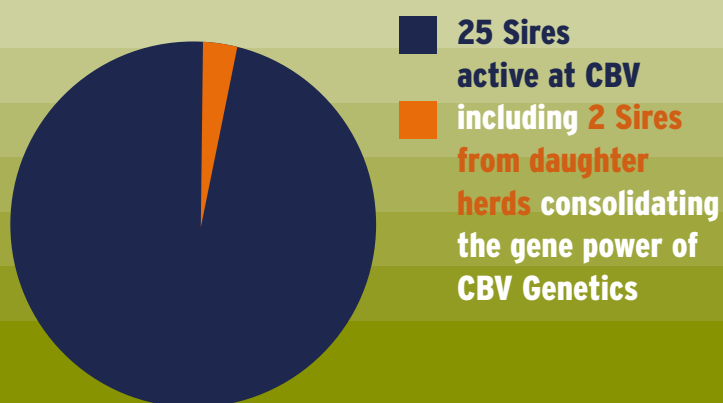

Simple Abundance

The simple abundance of key traits distinguishes CBV as the Number 1 Brahman breeder in Australia. All 25 of the top 25 published sires are bred and/or owned by CBV Genetics Group.

Simply ask yourself the question... Why is it so? *Professor Julius Sumner Miller*

The Helen Newton Turner Medal

Alf Collins Snr, one of the most innovative beef cattle breeders in the world, was awarded the prestigious Helen Newton Turner Medal for 2017.

The Helen Newton Turner Medal perpetuates the memory of an outstanding sheep geneticist, and a fine Australian. The Medal is awarded to provide encouragement and inspiration to those engaged in animal genetics.

Building on the foundations established by his father, Alf Collins Snr has applied enormous dedication, careful recording and rigorous focus on breeding for profitability, to the continuous improvement of Brahman cattle in the Collins Belah Valley (CBV) herd.

Brahman cattle have to perform in very challenging environments, and breeding programs to deliver genetic improvement in those environments are challenging too - reflecting large scale of operations and variable climatic conditions.

Alf has met these challenges head on and collected performance records underpinning reliable EBVs and used the information backed by hard-nosed practical understanding of functionality and survival ability, to generate very impressive genetic progress over several decades. Perhaps the most outstanding aspect of that genetic progress is that it includes very substantial progress in female fertility - something that has effectively been treated as 'too hard' by most breeders of tropically adapted cattle world-wide. CBV has actively participated in industry R&D, including significant contributions to beef CRC I, II and III.

Alf is a deep thinker about what cattle need to do in the tropical environment, and has never been afraid to try novel approaches or include new traits if they will help breeding cattle better and better suited to the environment and to improving profit.

Alf continues to be an outstanding pioneer and innovator in real-world application of genetics technology, and the demonstration that it is possible to breed genetically fertile, productive and profitable tropically adapted cattle is an inspiration.

Alf Collins Snr received the Helen Newton Turner Medal at the Association for the Advancement of Animal Breeding and Genetics (AAABG) conference in Townsville, Queensland on Wednesday 5 July 2017 and delivered the Helen Newton Turner Oration following the presentation.

Breeding Brilliance

**Harnessing reproductive science
for practical application and profit**

**CBV – Production EBVs for 45 years.
Collaboration in selection and mentoring,
totals another 50 collective years.**

**A cumulative data base bigger and stronger
than many breeds in Australia.**

**CBV IS NOT A MODEL - It is Real, Proven,
Growing, and Dynamic CO-OPERATION.**
