

ALF'S BULL SALE

26 August 2023

**fertile
gentle
growthy
adapted
brahmans**

2023

HELMSMAN ADAPTED SYSTEM

Original Helmsman Bid System created by Bruce Milne.

Buying commercial herd bulls this way combines useful features from auction and private treaty systems. You have the opportunity to bid on, and buy any bull in the catalogue at a competitive market value without pressure.

1. On arrival, intending purchasers register at the bid table and receive a Bid Number.
2. All bulls are penned for inspection, by category, as per the catalogue.
3. Opportunities abound. At 9am, all bulls are on the market simultaneously. You bid on any lot, regardless of catalogue sequence, by lodging a bid slip with a "runner". Having reached your price limit on a bull, you simply move onto your next selection of bulls anywhere in the catalogue.
4. From 9am buyers' opening bids will commence, starting at the base price written on the bidding boards. Further advances at a minimum bid value (as per the coloured schedule at right). There is no upper limit on the bids.
5. Bids are recorded on every bull, showing 'buyer number' and \$ value, on large boards, by category, in the central hub of the bull yards.
6. A bid, once submitted and recorded, is the responsibility of that bidder.
7. Coloured Timetable (see right).
At set times during the day, bulls with no new bids for a set period, will be deemed sold, as per ink colour. This helps multiple buyers, by designated times, to know they have secured their tally. It also enables some clients to exit the sale by 2.30pm, confident that their purchases are secure.

THE BENEFITS

NO SPLIT-SECOND DECISIONS. You have time to consider, to select and place deliberated bids on the entire catalogue.

By 1pm, buyers will know their core tallies with ample time to re-select other bulls, or advance bidding without auction pressure of instant decisions.

Re-selection is easy, as the yards are full of very similar genetics.

Buyers of groups of bulls with Helmsman gives broad choices, flexibility and time to average your budget.

Cover: CBV 11-9473 "Coconuts"

9am to 12 noon

Bids of **\$200** or higher.
All bids will be recorded in **BLUE** pen

12 noon to 1.00pm

Bids of **\$300** or higher.
All bids will be recorded in **RED** pen

At 1pm

Any bull price remaining in the original pen colour of **BLUE**, will be **deemed officially sold** for the amount listed to the buyer listed.

Lunch 1.00pm to 1.30pm

All bidding will be suspended while we enjoy some lunch.

1.30pm to 2.00pm

Bids of **\$400** or higher.
All bids will be recorded in **GREEN** pen

At 2.00pm

Any bull price remaining in the original pen colour of **RED**, will be **deemed officially sold** for the amount listed to the buyer listed.

2.00pm to 2.30pm

Bids of **\$500** or higher.
All bids will be recorded in **PURPLE** pen

At 2.30pm

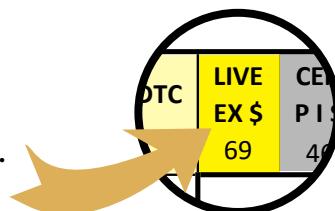

Any bull price remaining in the original pen colour of **GREEN**, will be **deemed officially sold** for the amount listed to the buyer listed.

At 2.30pm

Any bulls in **PURPLE** pen will be individually, verbally listed and further bids will be taken at this time in an open auction (to enable sale closure in reasonable time).

2023

Welcome to CBV

...again, welcome to simple abundance!

**Become familiar
with what makes the
difference. CBV!**

The coalface of change is where all the economic stimulative stuff happens. Constructive GENETIC stuff is designed and built to deliver "on time, every time."

The forge of adversity always sorts out the dross. People, economics, genetics, genomics, **are all tools** for economic survival.

'Managing well into the future is dependent on our **willingness to accept** our ability to adapt'.

Adapted genetics need to be well defined for the beef business to survive in global markets.

Reproduction and survival are keys, on time, every time, at low cost.

"Reproduction competence singly has vastly more influence on our 'bottom lines' than all other factors combined in beef production".

McLean/Holmes, The Australian Beef Report

Currently snowballing interest rates, and floundering cattle prices, in some sense, sharpens focus;

What's Real - What can get us through.
Feeling sorry for myself is of limited utility!

Every day there are grounds for digging deep into our resources - Regardless of the external stimuli.

NOW is always the time to stand for something good.

Searching for thoughts of meaning is never easy or simple - But essential.

**Don't do your best;
do what is necessary!**

Winston Churchill

Recently the ABBA board and its technical committee decided to design another \$index. The Central Production Index (CPI\$).JapOx\$ Index is dumped.

With emphasis on raw growth, and relegating reproduction to the dungeons, this all sounds like echoes of the deep past, from an era that brought disrepute on the Brahman breed in earlier decades.

But it will engender bigger models of fine form and limited substance. Not the role of Brahman, you may well ask?

Reflection on the past briefly is only of use if it's used as a compass, and incentive for our futures.

Historically the Brahman and other Zebu species globally have transformed tropical beef production, and profitability. Worth pondering, that during that transformational period globally of fifty years, 1920 to 1970, most Zebu species were reared on basic rations, at strictly commercial costs.

That divergence of 'cost of production' and key genetic indicators has illustrated the genetic futility of stud stock beauty pageants and 'sale preparation' comparatively, when put under hard-nosed scrutiny in range-land production.

There are plenty of flamboyant sales, record prices, expensive land holdings lightly stocked, and awesome weaner weights, spectacular early puberty thresholds, amazing rebreed rates, based on dubious premise, and all touting awesome economic promises. We do not give much credibility to this pathway for long term true genetic gain, or economic progress.

We can only wish them well.

CBV certainly does not embrace this level of thinking.

"The significant problems we face cannot be solved at the same level of thinking we were at when we created them"
(Albert Einstein)

CBV chose 'the road less travelled' a lifetime ago, confident of genetic divergence, and daring to run our own race.

In any business, there is a need to hunt for improved economic pathways. (look at poultry & pork) CBV does what is necessary.

CBV uses data to illustrate commercial realities and possibilities.

We hunt relentlessly for substance. Genetics is all about discovery, and application. Genomics is deep diving and constant validation.

None of the above is related to making momentous sales or promotions.

All of the above is about making a safer, more rewarding platform to have fun and enjoyment in your cattle business.

If it is always profitable, it can simply be fun.

Seeking the truth of the matter, measuring cattle under duress certainly yields economic results.

Developing truly proven and adapted cattle for the difficult jobs ahead. Marathon runners in a very real sense; a noble task indeed.

Reproduction is the supreme arbiter of adaptation... AT LOW COST.

THIS IS THE LONG GAME. Just like our marathon runners - Having the courage to run your own race takes strategy, determination , perseverance, measuring your pace every km, and knowing your true capacity.

CBV operates on the practical base of adversity in grazing, and matings. Yes, stocking pressure can be risky, but certainly defining low cost of production. Very few land unit dollars per kg produced will certainly give a picture of thrifty young cattle, early puberty expression at light weights, and the survivors of this regime of challenge have no equal, in my experience.

Mark and DeLeah Morawitz at Walcha, NSW - (snow country!) turn off Prime Ox weights at milk tooth, sired by two generations of CBV bulls, and driving down his cost of production. High rebreeds, lowering dystocia and dropping risks in management are the keys to success.

In the breeder paddock with the worst rebreeds, he had 100% pregnant in his 'CBV bred' segment of cows. This is no accident. THAT IS A NOTABLE SUCCESS.

Just a coolheaded approach to doing what is right and scientifically prudent, governed by his demand to drive economic risks down, and production per land unit upwards...Preserving and developing his margins. Carl and Gail Morawitz have bred a family and a culture of great ethics and ability.

This hunt for truly meaningful economic results has long been the study of Emeritus Prof Michael D'Occchio, governed by his understanding of endocrinology and reproduction physiology. We give great tribute to Michael, along with Professors Jim Kinder, Pietro Baruselli, Giuseppe Campanile, and Antonio Limone.

These highly qualified thinkers and researchers **understand** the hunt for fertility driven profits in their realms of science. They continue to collaborate and seek new and innovative pathways for the betterment of livestock production.

Einstein "Any fool can know. The point is to understand".

One of our wonderful collaborators in genomics, Prof Ben Hayes, stated in a recent conversation, that he 'would adopt our CBV mantra of a calf on time, every time, at low cost' to encapsulate all of the variable debates about definition of Adaptation.

'WHAT IS TRULY ADAPTED?'... It is all about seeking profit in the grazing business.

The Eureka Moment is always based on adaptation and reproduction competence, at low cost.

This discussion has gone on for generations, with no real clarity within the breed societies in regard to economic security for downstream application of stud breeder dogma. Cosmetic cattle have no relevance in meaningful commercial businesses.

Be mindful of the natural human psyche of conformity. Only dead fish go with the flow.

Adapted salmon only spawn by racing against harsh raging cold waters, to effect mating success.

Professor Ben Hayes is a giant in cutting through the dross in dairy analysis, with Prof Mike Goddard and others, in Europe and Australia over recent years. His field of genomics covers a huge range of living things, plants and animals. CBV has enjoyed breakthroughs in collaboration with him, and continue to develop practical pathways in science.

As humans, we interpret from what we know, **not** from what we need to know.

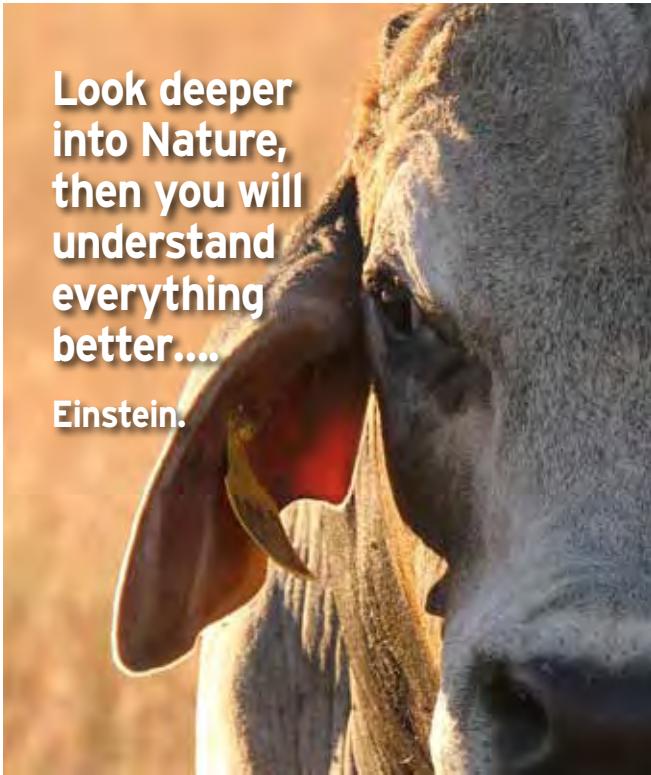

That may be comforting short term, but in the long game of progress, bound to be disappointing.

If we knew what we were doing, it wouldn't be called research, would it?

(Albert Einstein)

**Look deeper
into Nature,
then you will
understand
everything
better....**

Einstein.

**Unless you can depict your opinion in numbers,
your knowledge is of the most meagre kind.**
(Ernest Rutherford, the father of nuclear physics.)

**We had no money, and limited equipment, so we
had to use our brains.** (Rutherford)

Managing well into the future is dependent on our **willingness to accept**, our ability to adapt.

ADAPT, ADOPT, AND GO FORWARD.

This is the hunt for truly adapted cattle.

'Nothing in animal production can equal reproduction on time, at low cost and the cumulative benefits to your bottom line'.

All other factors combined fade into insignificance, compared to adapted reproductive efficiency for profit.

Whatever cattle do not measure up to your reproduction speed requirements immediately become **Cash-Flow!**

**That cashflow is a superb
incentive to hunt for more
targets to harvest!
Focus!**

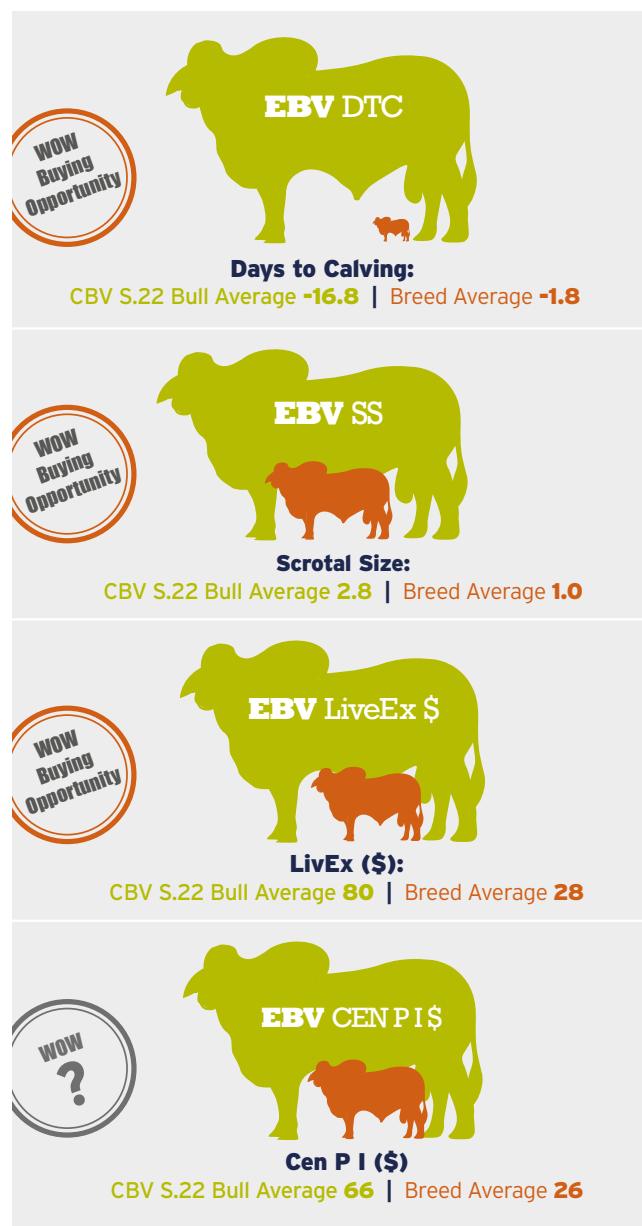

CBV Associate Herds are a strong element in our pure depth of data and global analysis. We share sires, collaborate on breeding strategies, jointly market and have fun. Well over 200 sires, of high accuracy are utilised. Roughly 12,000 head of brahmans, all managed on strict schedules, with roughly 40 years of background data in each herd, all adds up to a formidable genetic powerhouse.

All focused.

Specifically at CBV and associate herds, **the results of that focus have surprised us**, and astounded stud pedigree breeders, their Breed Societies and extentionists who stated there was no role for reproduction in genetic progress in adapted cattle and food production.

Adapted cattle are certainly our answer in our hunt for higher production and lower costs. That is, Kg per hectare per 100mm of rain, and pregnant on time, every time. Trash the rest.

•CBV•
COLLINS BELAH VALLEY

DATA...

the guiding hand!

For commercial results... off grass.

Over 40 years
... of super selection.
... of no tolerance of freeloaders.
... of dedication to purpose.

Fertile | Gentle | Growthy | Adapted Brahmans

cbv.com.au

In my own case, I know how much I have benefited from gentle but persuasive encouragement to the next level of thinking, by respectful friends and mentors.

Practical men and women, and brilliant scientists in many countries, have gone out of their way to stimulate our enquiring minds; sharing their lifelong experiences.

THAT HAS ALWAYS BROUGHT US TO THE CORE ELEMENTS OF FOCUS.

Reproduction.
On time. Every time.
Never forget...
At low cost...

The biggest single production cost is land, or beast area, or simply grass.All other costs combined, fade into insignificance.

Selection for raw mass;
Simple growth = consumption.

THAT IS
A ZERO SUM.

\$\$\$\$\$\$

Innovative management has resulted in the development of CBV...

CBV, "THE BREED WITHIN A BREED".

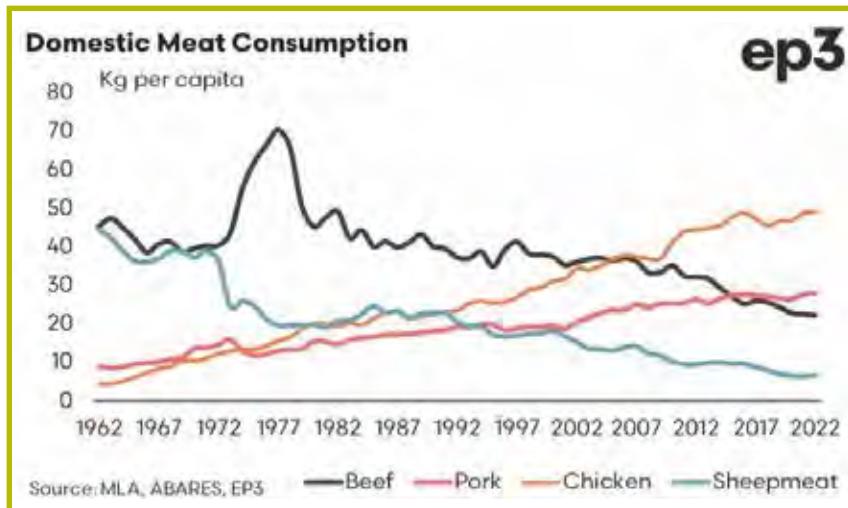

This is healthy evolution and absolutely necessary.

The studies of per capita protein consumption is a classic example of where CBV focussed management has hit the target with low cost operation, in relevant genetic terms.

Poultry is constantly winning consumer preference, followed by pork, with beef and lamb in constant decline.... Mostly this is driven by retail cost, underlaid by cost of production.

The same patterns are obvious in all continents.

Keep lifting the cost of production at your peril!

A broad matrix of herd makeup illustrates that 70% of kg inventory is mated females.

10% each for growing heifers and steers and 10% sale steers complete the picture.

So, of course our responsibility is to propagate and multiply females worthy of the grazing space that continue to function at a reasonable cost. Dominant thought. Dominant outcome..

That's not easy, but very achievable. The 30% of dry cattle are never a threat, as the male portion is always cashable in a pinch.

No amount of incentive paid for a steer will compensate for ineffective cow herds.

Again, highly fertile females, operating at low cost, takes care of the business.

QUOTE; 'Anybody can be a farmer in the good times; it's how we prepare ourselves for the tough times that defines management'.
(Nikko Lord 2023)

Well said, Nikko.

Nikko's parents Ardie and Kacie have an awesome track record of preparation, implementation and business growth, for five decades.

A consistent hallmark of long term CBV clients is their developed capacity for business expansion and nett growth, regardless of seasons and markets. There lies the truth of the matter.

These men and women sought to understand the CBV example of cow herd development and management, dominated by sire inputs. They adapted those principles to serve their individual circumstances. THE LONG TERM RESULTS; growth and economic strength.. and it is fun!

**"Creativity is,
intelligence
having fun"**
(Albert Einstein)

As in every story of progress, in science or commerce, we owe

a huge gratitude to those who strode fearlessly before and during my time in cattle. No one person can claim universal or exclusive ascendancy; daily I thank God for His creations and the wonderful cattle and people He has put in our path.

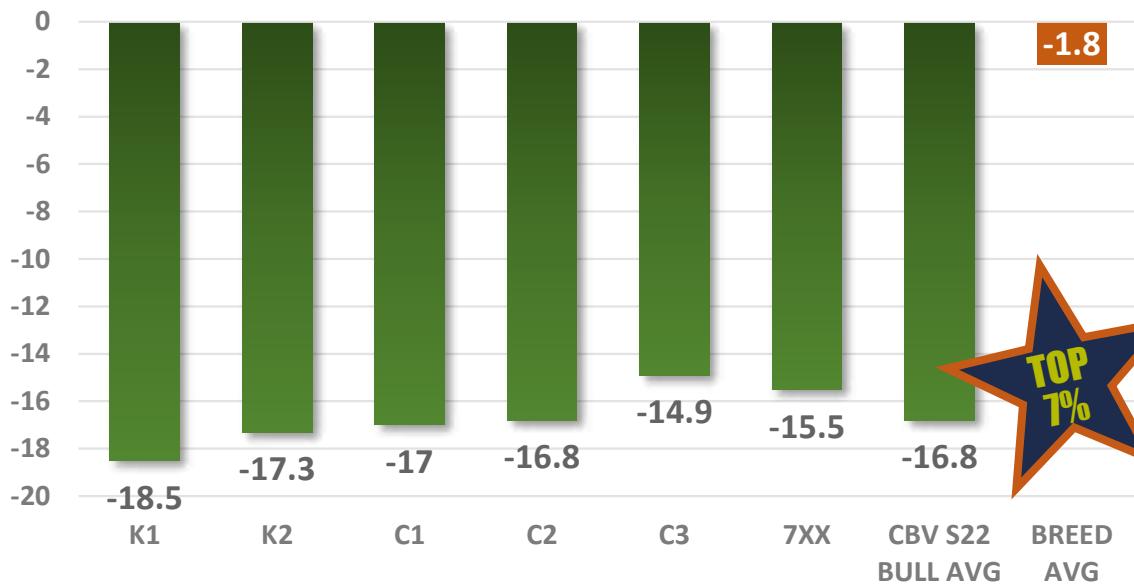

The strength, courage, kindness, faith and example set by my wonderful parents in retrospect, still grows. Blessings abound in this simple abundance.

Sincerely,

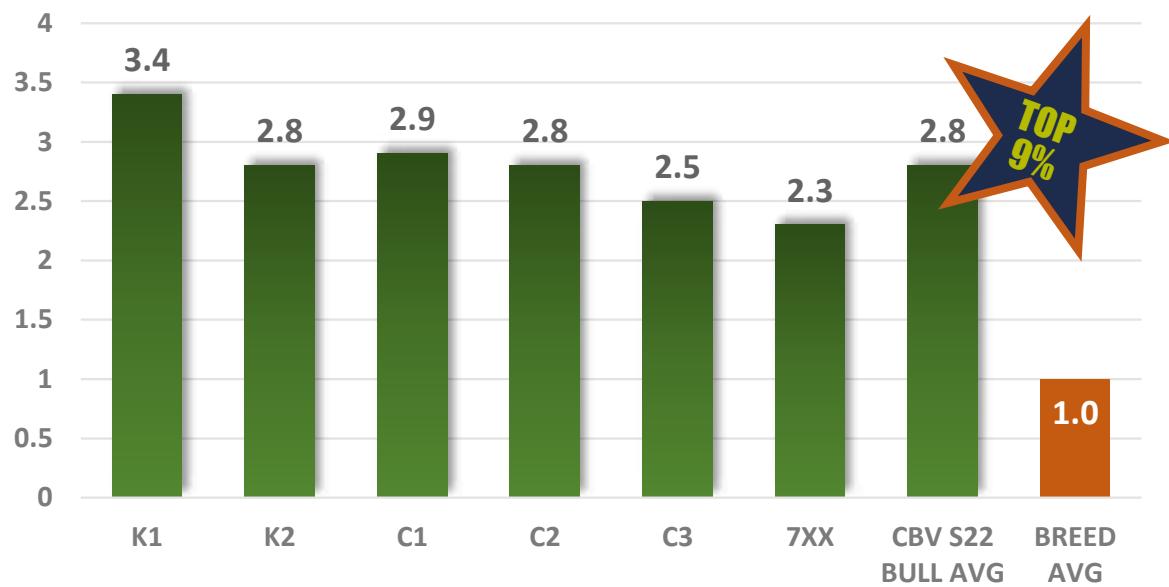

Alf Collins CBV

DISCOVERY...

CBV THE BREED WITHIN A BREED

High efficiency Brahmans. Adapted beef cattle. No doubt about it.

CBV has **never** tried to prop up our search for meaningful genetics by light stocking rates, rich diets, or extraordinary country.

We do find true marathon runners in genetic terms.

All other vendor's cattle including Heifers on coastal country this year.

CBV stocks days per hectare per 100 mm are quite extreme.

CBV 'speed bands' for mating are illustrative and transparent. (C1 to C5 digitally)
Speed Bands are; Alpha, Bravo, Charlie, Delta, and Echo, in phonetics - the ABC of genetics at work on grass.

Learn more about these ABC structures by calling CBV.

There are no shortcuts, no quick fixes – more a matter of doing lots of small things well... Relentlessly!

So... CBV focuses on

- what we can influence,
- what we can change.

In genetic terms, the results of tight management are bearing fruit.

CBV people are architects of change.

For commercial results... **off grass...**

43 years of super selection.

43 years with no tolerance of freeloaders.

Forever, it seems - dedicated to purpose.

Pure thrift... the benchmark for a successful society.

CBV - THE INTERNATIONAL BENCHMARK FOR BRAHMAN

Cows with * in the ICI column.

These are merit cows that failed to wean at CBV and continued to breed in daughter herds

Note regarding Polled, Scurred, or Horned in Catalogue.

Polled, Scurred and Horned status is confirmed by DNA for CBV, 1VV, LCL, RW and Copley bulls. The GEG polled/horned bulls are based on observation at branding.

Category 3 Page 71

Gemma and Bill Geiger - 'Oaklands'

1349 Bracewell Road BRACEWELL Q 4695

Please Note: All GEG bulls are in the same pen. In the catalogue, bulls are listed numerically by Category: Cat 1: (4 head), Cat 2: (10 head), Cat 3: (25 head). For easier identification, a colour reference has been included, next to their Category: G [Grey], DG [Dark Grey], R [Red], LR [Light Red], Y [Yellow/cream].

* Breed Median Value

Simple Abundance

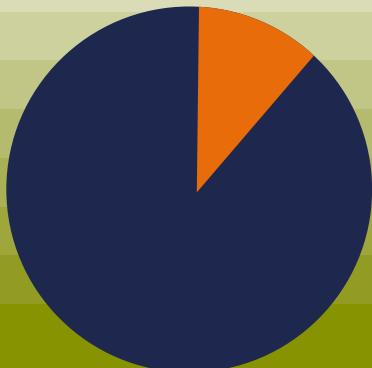

The simple abundance of key traits distinguishes CBV as the dominant Brahman breeder in Australia. 22 of the top 25 sires with progeny analysed for Days to Calving, are bred and/or owned by CBV.

Simply ask yourself the question... *Why is it so?*

The Helen Newton Turner Medal

Alf Collins Snr, one of the most innovative beef cattle breeders in the world, was awarded the prestigious Helen Newton Turner Medal for 2017.

The Helen Newton Turner Medal perpetuates the memory of an outstanding sheep geneticist, and a fine Australian. The Medal is awarded to provide encouragement and inspiration to those engaged in animal genetics.

Building on the foundations established by his father, Alf Coliins Snr has applied enormous dedication, careful recording and rigorous focus on breeding for profitability, to the continuous improvement of Brahman cattle in the Collins Belah Valley (CBV) herd.

Brahman cattle have to perform in very challenging environments, and breeding programs to deliver genetic improvement in those environments are challenging too - reflecting large scale of operations and variable climatic conditions.

Alf has met these challenges head on and collected performance records underpinning reliable EBVs and used the information backed by hard-nosed practical understanding of functionality and survival ability, to generate very impressive genetic progress over several decades. Perhaps the most outstanding aspect of that genetic progress is that it includes very substantial progress in female fertility - something that has effectively been treated as 'too hard' by most breeders of tropically adapted cattle worldwide. CBV has actively participated in industry R&D, including significant contributions to beef CRC I, II and III.

Alf is a deep thinker about what cattle need to do in the tropical environment, and has never been afraid to try novel approaches or include new traits if they will help breeding cattle better and better suited to the environment and to improving profit.

Alf continues to be an outstanding pioneer and innovator in real-world application of genetics technology, and the demonstration that it is possible to breed genetically fertile, productive and profitable tropically adapted cattle is an inspiration.

Alf Collins Snr received the Helen Newton Turner Medal at the Association for the Advancement of Animal Breeding and Genetics (AAABG) conference in Townsville, Queensland on Wednesday 5 July 2017 and delivered the Helen Newton Turner Oration following the presentation.

AGBU Media Release 2 July 2017

The hunt for true adaptation....

**At CBV, we're batting
way above the Breed average...**

There are no shortcuts,
no quick fixes. More a
matter of doing lots of
small things well...
Relentlessly!

**We're in this for the
LONG GAME!**

Only highly adapted cattle can,
and do reproduce on time, every time.

Reproduction is the major arbiter of
true adaptation and profit.

CBV focuses on what we can
influence, what we can change -
measuring by meaningful metrics.

CBV analyses TOTALLY
on low-cost grazing.

In genetic and genomic terms,
the results of tight management

**have delivered -
a REAL GAME CHANGER!**

**43 years of super selection.
43 years with no tolerance
of freeloaders.**

'Collins Belah Valley' | Marlborough, Queensland
